Subject: RE: Mackinac Island Vehicle Permit
Attachments: 2023-0657 Mackinac Island Pier #1 - Proposed Test Boring Locations 10-9-24.pdf

Good morning Danielle,

No problem, we will be drilling through the pier, the holes will be cored & located by our client prior to drilling. Please refer to the attached boring plan.

The skid steer is just to assist moving the drilling rod & materials around the site. Please let me know if there are any other questions.

Thanks,

Hanna Barton
