Soil Erosion and Sedimentation Control Permit

Permit Number

PR-5159

Date Issued

11/11/2024

Expiration Date

11/11/2026

Name of Permittee: JAQUISS, CHERYL Cheryl Jaquiss

Address:

Telephone Number: (501) 690-7305

Location of Project:

Address: 6948 Main St Mackinac Island MI 49757

Property #: 49-051-525-041-00 T 40N N R 2W Sec. 25

Township: Mackinac Island

Permitted Earth Change Activity: [Residential/Commercial/Pit]

Residential Construction

Excavation/fill 2000 **(approx. sq. ft.) necessary for the construction of a** House demolition and foundation excavation

Lake/Stream Near Site:

225' to Lake Huron

Contact on-site: Belonga Excavating

Telephone Number: (906) 643-7760

1 Permit Must Be Posted Onsite

SPECIAL PERMIT CONDITIONS

1. As identified in the enclosed site plan all SESC measures will be properly installed upon start of work between construction site and lake/stream to prevent sedimentation of waterway. Site visits may reveal the need for additional temporary or permanent erosion control measures.
2. Controls to remain until final grading and site restoration.
3. Heavy hay mulch cover to be used on all raw soils upon restoration.
4. The permitted activity shall be completed in accordance with the approved plans and specifications, and the attached general and specific conditions.
5. The permit does not waive the necessity for obtaining all other required federal, state, or local permits.
6. Permittee shall notify the permitting agency within one week after completing the permitted activity or one week prior to the permit expiration date, whichever comes first.

Issuance of this permit does not waive the need to obtain other local, state, or federal permits. Of particular importance are state MDEQ permits that cover work in or adjacent to lakes/streams [Part 301], wetlands [Part 303], and floodplains [Part 31].

GENERAL CONDITIONS

In accordance with Rule 1709 promulgated under the authority of Part 91, Soil Erosion and Sedimentation Control, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended, and in addition to the information on the attached plan(s) and special conditions, the following general conditions apply to the earth change authorized by this permit:

- Design, construct, and complete the earth change in a manner that limits the exposed area of disturbed land for the shortest period of time.
- Remove sediment caused by accelerated soil erosion from runoff water before it leaves the site of the earth change.
- Temporary or permanent control measures shall be designed and installed to convey water around, through, or from the earth change at a non-erosive velocity.
- Install temporary soil erosion and sedimentation control measures before or upon commencement of the earth change activity and maintain the measures on a daily basis. Remove temporary soil erosion and sedimentation control measures after permanent soil erosion measures are in place and the area is stabilized. "Stabilized" means the establishment of vegetation or the proper placement, grading, or covering of soil to ensure its resistance to soil erosion, sliding, or other earth movement.)
- Complete permanent soil erosion control measures for the earth change within five calendar days after final grading or upon completion of the final earth change. If it is not possible to permanently stabilize the earth change, then maintain temporary soil erosion and sedimentation control measures until permanent soil erosion control measures are in place and the area is stabilized.
