Project Proposal: Display Case Installation for MITB Member Information

We propose the construction and installation of two custom display cases to enhance the visibility of our member businesses' flyers, schedules, and event information. Each case will feature a durable wood frame painted white for a clean, professional appearance, a clear plexiglass front for visibility, a corkboard back for easy flyer attachment, and a secure locking mechanism to protect the contents. These cases will be mounted along the side of the Tourism building, closest to Murray Hotel, allowing us to showcase materials without cluttering or obstructing our booth window, ensuring a more organized and accessible display solution. This initiative will help us share and better support our member businesses while improving our booth's appearance and functionality.

The two display cases would be located in each of the panels on the side of the booth.
