## MCTC 2022 State Legislative Platform

Issue	Goal	Strategy
1. MCTC's Priority Projects	Aggressively pursue funds         through the State Budget,         California Transportation         Commission (CTC) allocation         process or any other state         sources.	<ul> <li>In 2017, the legislature enacted SB 1 (Beall), Chapter 5, statutes of 2017, which provides \$5.2 billion in annual revenues to fund traffic congestion relief, highway rehabilitation and safety, local streets and roads repair, and multi-modal options through investments into public transportation, commuter and intercity rail, and bicycle and pedestrian programs. Caltrans is proposing to make crucial investments on State Route (SR) 99 between Madera and Fresno County. The proposed \$33.5 million 2022 ITIP contribution, coupled with Madera County's Mid-Cycle Regional Improvement Program (\$832,000) and SHOPP funds (\$44 million), will eliminate a 5.8 mile four-lane bottleneck, alleviating severe congestion, enhancing safety, and enhancing goods movement throughput on State Route (SR) 99 between Avenues 7 and 12 in Madera County by constructing additional lanes in the median. The California Transportation Commission will also be adopting guidelines for the SB 1 Cycle 3 competitive programs during the summer of 2022.</li> <li>Additionally, the State General Fund is projected to have a \$45.7 billion surplus for FY 22-23, with over \$20 billion in discretionary spending. There is also a \$4.5 billion carryover of resources (\$3.4B General Fund and \$1.1B interest earnings on transportation account investments) from FY 21-22.</li> <li>MCTC will remain diligent in competing for additional state funds to improve safety, congestion management, and goods movement throughput on State Routes 41 and 99.</li> <li>MCTC will also assist local jurisdictions to pursue revenue made available through the Cap and Trade and Active Transportation Programs, for operations and capital needs for bus, rail and bicycle and pedestrian programs.</li> </ul>

Issue	Goal	Strategy
		In 2014, the Legislature called for a pilot program (SB 1077) to study a road charge model as a possible replacement source to the gas tax. Due to the limited number of participants from rural and low-income areas and the truncated timeline, more work is needed to recommend an appropriate charge rate. Issues include protecting privacy relating to data collection, enforcement, and compliance. While the enactment of SB 1 has delayed possible implementation, Governor Newsom's Executive Order, N-79-20, which prohibits petroleum- powered vehicles sales by 2035, has accelerated conversation on converting to alternative fuels and electric vehicles, which do not pay at the pump. Reducing vehicle miles traveled in Madera County is a challenge given the lack of density and jobs/housing imbalance, and the impracticality of certain populations to use transit (labor, agricultural workers) so travel be passenger vehicle is vital. <b>MCTC will monitor Road User Charge Technical Advisory Committee's</b> <b>activities. Balancing the needs of weaning our dependence on petroleum to</b> fund transportation, while ensuring that a regressive replacement funding mechanism to the gas tax is not imposed, is critical to protecting disadvantaged communities and Madera County residents in conducting daily activities. Utilizing the vehicle registration fee may prove to be a more equitable option.
2. Regional Partnerships	Coordinate with the San Joaquin Valley Policy Council to raise awareness for the Highway 99 Corridor and highlight its' importance as a transportation facility of state and national significance.	Educate our delegation and funding partners, such as the California State Transportation Agency (CalSTA), CTC, Caltrans, and the Newsom Administration, about Highway 99, including the funding plan, and attributes that make it a highway of state and national significance, as previously recognized by the Brown Administration in letters submitted to the Trump Administration. Work with San Joaquin Valley COGs (Fresno, Kern, Kings, Merced, San Joaquin, Stanislaus, Tulare) and Caltrans to raise awareness of the importance of Highway 99 and its need for improvements as one of the two major interregional corridors in the state and the vital role it plays in goods movement in addition to regional connectivity to major metropolitan areas. MCTC will collaborate with San Joaquin Valley partners to pursue funding to improve safety and goods movement conditions on Highway 99.

Issue	Goal	Strategy
		emission account for opportunities and limitations within the region.
3. Transit Funding Reform	Support potential changes to the Transportation Development Act that will assist local public transportation systems with funding eligibility.	The Transportation Development Act dedicates a statewide ¼-cent sales tax for each county for local transportation purposes. That 1/4 cent sales tax, known as the Local Transportation Fund (LTF), generates over \$1.5 billion annually, primarily for public transit. Madera County operators have had difficulty in meeting the farebox recovery ratio (FRR) requirements (20% for urban operators) that are necessary to qualify to use funds for operational purposes. AB 149 (Committee on Budget), Chapter 81, Statutes of 2021, provides statutory relief in meeting farebox recovery requirements for receiving State Transit Assistance (STA), Low Carbon Transit Operations Program (LCTOP), and State of Good Repair funds, through fiscal year 22-23. It suspends Transportation Development Act (TDA) and STA penalties for this duration. The bill also adds a list of new exemptions from the farebox recovery calculation, including on-demand service and micro transit service beyond fixed-route service, costs for security, ticketing services, pensions, planning for improvements in transit operations, integration with other operators and agencies, transitioning to zero-emission operations, and for compliance with state and federal mandates. The California Transit Association is hosting a working group to look at additional potential long-term changes in 2022.
		operators are provided with flexibility to continue accessing funding to maintain and expand service.
4. Greenhouse Gas Emissions Reduction Mandates	Monitor activities on conversations regarding the jobs- housing imbalance and the impact on vehicle miles traveled. Protect transportation funding from being withheld or diverted and find other alternatives to address meeting affordable housing goals.	Per AB 179 of 2017, the CTC and California Air Resources Board are required to convene twice a year to coordinate transportation policies, with a focus on reducing vehicle miles traveled and greenhouse gas emissions. The California Department of Housing and Community Development has been added as a participant. Concurrently, the legislature continues to work on providing resources to develop additional affordable housing and assess job creation opportunities to help mitigate vehicle miles traveled. In 2019, the legislature enacted AB 101, Chapter 159, Statutes of 2019, which provided resources for local jurisdictions to zone for additional affordable housing.
		On September 20, 2019, Governor Newsom issued Executive Order, N-19-19, directing the California State Transportation Agency to leverage \$5 billion in state

Issue	Goal	Strategy
	Support state funding to expand infrastructure and incentives for conversion to electric vehicles to reduce greenhouse gas emissions. Monitor the implementation of SB 743 and protect the ability to continue addressing congestion management and safety on the state highway system. Ensure predictability and stability of transportation revenue should conversion occur due to lack of reliance on petroleum consumption to address greenhouse gas emission reduction.	funding to encourage mode shift with an emphasis on reducing greenhouse gases and vehicles miles traveled. Regional transportation planning agencies face greater challenges in addressing mobility and congestion management while accounting for local land use planning and complying with state mandates to reduce greenhouse gas emissions and vehicle miles traveled. Given the unique geography of Madera County and the travel patterns associated with the jobs- housing nexus and goods movement, has exacerbated gridlock traffic, making reducing vehicle miles traveled a challenge. The prospects for reducing greenhouse gas emissions however could be realized through state investments made to improve the availability of charging station infrastructure and providing incentives for converting from gas-powered to electric passenger vehicles, where feasible, along the state highway system. On September 23, 2020, Governor Newsom issued Executive Order N-79-20, which prohibits the sale of gasoline- powered passenger vehicles by 2035, promotes zero-emission vehicles for future mobility needs. Given that transportation is predominantly funded through the gas tax, a successor funding mechanism will be needed. Per the bill's legislative intent, SB 743, Chapter 386, Statutes of 2013, was explicitly enacted to provide CEQA relief for the construction of the Golden 1 Center in Sacramento but is being used as a template for prospective transportation planning on the state highway system, with an emphasis on eliminating capacity projects and further influencing local sales tax measure investments. This could have an impact on the administration of delivering projects within the voter-approved Measure T expenditure plan. The Governor's January FY 22-23 State Budget proposes \$10 billion over the next six years to invest into zero-emission vehicles and charging infrastructure, which includes money for lower income individuals, school buses, transit buses, and drayage trucks. MCTC will also work with organizations such as the California Leag

Issue	Goal	Strategy
		communities, for electric vehicle conversion by minimizing concerns over range, cost, and infrastructure.
		MCTC will also support operational improvements such as telecommuting (by accessing proceeds from the \$6 billion for broadband infrastructure the legislature approved in the FY 21-22 budget of federal money), vanpools, shipping more freight via rail, and promoting opportunities for regions to sell mitigation credits to generate revenue for providing multi-modal options.
		MCTC will work with organizations such as the California League of Cities, California State Association of Counties, San Joaquin Valley Policy Council, among others, to protect transportation funding from being withheld or diverted, while working with stakeholders to find alternatives to address jobs-housing imbalance. This includes monitoring the implementation of SB 743 and its impact on addressing safety, congestion management, goods movement on the state highway system to ensure that capacity projects are not precluded from being funded.
		MCTC supports a revenue-neutral conversion to a source that ensures equity in revenue collection that does not disadvantage those that must drive further to job centers. Distribution should respect the vital role the San Joaquin Valley plays in maintaining system integrity and providing mobility options.
		MCTC will also pursue funding from the \$10 billion made available through the Governor's FY 2022-23 State Budget, to make investments into zero- emission vehicle infrastructure and incentives for zero-emission vehicle purchases that may assist those in disadvantaged communities.

Issue	Goal	Strategy
5. Passenger Rail	Provide enhanced passenger rail commuter service connecting the Valley to the Bay Area and Southern California	Work cooperatively with CalSTA, Caltrans Division of Rail, Amtrak, CTC, LOSSAN, ACE, San Joaquins, and Union Pacific Railroad to expand passenger rail service to accommodate for Madera County residents.
	Maintain and increase funding for commuter and intercity passenger rail for Ace/ San	Madera will also continue to diligently work on establishing extended commuter/intercity rail service to not only offset the impacts of congestion on SR 99, but to also reduce greenhouse gas emissions, and expand mobility options.
	Joaquins. Pursue funding opportunities made available through CaISTA.	MCTC will advocate to increase and acquire funding from CalSTA through the State Rail Assistance and Transit Capital and Intercity Rail Program.
