

Axon Body 4

Axon Body 4 isn't just a body-worn camera — it's a connected device built to empower real-time policing. With Axon Assistant putting the power of AI right on officers' vests, live communication and streaming for situational awareness, and seamless integration into the Axon Fusus platform, Axon Body 4 gives first responders the tools and information they need to make faster, smarter, safer decisions. All this, in a reliable, durable device with enhanced video performance, smarter controls, and a battery that lasts the whole shift.

Whether you're capturing critical footage or coordinating in real time, Axon Body 4 keeps you connected to your team, your command center, and your community.

Axon Assistant

Axon Assistant is an intuitive AI assistant on the body-worn camera, providing first responders with the information they need, when and where they need it. The push-to-talk interface allows officers to keep their eyes up, instead of down on a phone screen. The first skills of Axon Assistant are Real-Time Translation, automatically translating speech to facilitate communication with community members, and General Q&A, providing officers with answers to common questions they may have in the field directly from their camera via voice, with more planned for the future.

Capture From Any Angle

More Points of View with the POV Accessory

You don't have to choose between a body-worn camera and a POV camera — with the optional POV accessory, Axon Body 4 gives you both in the same system for ultimate flexibility. Get the shot from the shoulder, helmet, or around corners using the lightweight, durable accessory. IP67-rated with no charging required, the accessory can be plugged in for use when you need it.

Key Capabilities & Benefits

Communicate and Connect for Safer Responses

With device connectivity enabled, Axon Body 4 enables teams to operate with more confidence and clarity. Real-time alerts and GPS location sharing offer heightened situational awareness, while livestreaming and bidirectional communications allow command staff to gain immediate visibility into critical incidents as they unfold. With included Axon Fusus map access, each connected Axon Body 4 becomes a live node in a broader, smarter network, driving informed responses and safer outcomes.

- **Live Locations and Alerts:** Know where your officers are and be aware of potential escalations with live locations on the Fusus map and automatic notifications through Axon Signal technology.
- **Livestreaming and Watch Me Requests:** Livestreaming gives supervisors real-time visibility to help assess resource needs. Officers can press the Watch Me button to immediately request livestream support.
- **Bidirectional Communications:** Supervisors and support staff can speak directly with officers through the camera's speaker for quick communications.
- **Priority Evidence Upload:** Upload critical footage automatically for faster review.
- **Real-Time Translation:** Officers can quickly communicate with speakers of 50+ languages during everyday interactions using Axon Assistant, directly accessible on their Axon Body 4. The Assistant enables real-time, audible translation through the camera, supporting immediate understanding in the field.

Sharper Video, Longer Battery, Smarter Workflows

Axon Body 4 is designed for full-shift high performance, delivering clear footage, extended battery life, and configurable options that fit the way your agency works.

- **Expanded Field of View:** New 160° field of view and 4:3 aspect ratio option increases visibility by 39%.
- **Upgraded Sensor:** Enhanced 5 MP resolution brings sharp, clear imagery for every frame.
- **Long-Lasting Battery:** Large 3400 mAh battery allows for all-day uptime, even with the use of connected features.
- **More Storage, Kept Secure:** 128GB solid-state storage with AES 256-bit encryption for robust security.
- **Quick Recharge:** Magnetic, quick-breakaway fast-charge delivers a 20% higher charge in 30 minutes.
- **Flexible Configuration:** Programmable buttons, role-based permissions, sleep/mute reminders, and power confirmations are configurable to suit needs.
- **Simple Registration:** Register a high volume of cameras — up to 100 at a time — quickly, easily, and at once using the Axon Device Manager and Axon dock.

Key Capabilities & Benefits

**One Part of a
Connected Ecosystem
for More Safety
and Efficiency**

Seamless integration with other Axon technologies makes Axon Body 4 become an even more powerful source of intelligence, enabling faster response, better collaboration, and more efficiency.

- **Ensure Crucial Footage is Captured:** Axon Signal technology ensures cameras are activated based on configured criteria, like a weapon being pulled from its holster. In the event a camera is never activated during an incident, recover footage from up to 18 hours prior with Video Recall.
- **Leverage Other Devices for a Fuller Picture:** Sync body-worn and in-car camera footage from Fleet 3 with multi-cam playback and evidence management workflows.
- **Build a Real-Time Crime Center:** Connect with Axon Fusus for a unified command view of livestreams, GPS locations, and alerts from body-worn cameras as well as other data feeds, all in one platform.
- **Save Time Writing Reports:** With Draft One, use Axon Body 4 footage transcripts to create a first draft of a police report, to spend less time report-writing and more time protecting.

Specifications

Video Resolution	1440, 1080, 720, 480
Video Format	MPEG4
Battery Life	13+ hours
Storage	128 GB
Pre-Event Buffer	Configurable up to 120 seconds
IP Rating	Camera: IP68 POV accessory: IP67
US Military Standard	MIL-STD-810G
Drop Test	6 feet
Operating Temperature	-4 to 122 fahrenheit
Encryption	XTS-AES-256 full disk encryption
