If quoted product varies in name, description or functionality from that requested, provide complete and accurate description	Extended Price
-	rvices Req's)	Yes	No	Partial	Details / Functional Description	
	Hard Wired : It is preferred that all Physiologic Monitoring equipment will reside on the HOSPITAL LAN. Hospital will provide network drops at each monitor, & central location. If vendor requires proprietary network, it is the sole responsibility of equipment vendor to disclose and include all costs of design & labor to create this network. ALL COSTS FOR FUNCTIONING NETWORK MUST BE INCLUDED HEREIN	x			Customer choosing to put their own cable have the following responsibilities Customer is responsible for: Purchasing cable and hardware as required; Pulling the cable runs per specified drawing; Testing the cable runs and providing a verification report; Hanging the	see quote
Networking	Wireless: It is preferred that all Physiologic (<i>Transport</i>) Monitoring equipment will reside on the HOSPITAL 802.11 WLAN. If vendor requires proprietary network, it is the sole responsibility of equipment vendor to disclose and include all costs of design & labor to create this network. ALL COSTS FOR FUNCTIONING NETWORK MUST BE INCLUDED HEREIN Hospital will provide a wireless site survey and cable pulling.		x		Covers cable pulls, access points, & material for the installation, setup of a 2.4/5GHz network Quantity equals the total square footage of the coverage area divided by 100. Customer pulling their own cable qualifies for a 35% discount off list price.	see quote
-	Telemetry: It is REQUIRED that telemetry equipment will reside on a 1.4GHz WMTS network. 608MHz and / or Wi-Fi telemetry will not be accepted or considered. It is the responsibility of equipment vendor to cover all costs and labor to create this network except for cable pulling. Hospital will provide cable pulling.	x				see quote
	WAN Connectivity to ALL Mangum Regional Hospital facilities: Vendor must provide the ability for equipment to communicate across the hospital wide area network to remotely monitor patient monitoring devices and capture all data required in the sections below. This includes capturing data from all monitored departments through Mangum Regional Hospital.	x				see quote
	Troffic Segmentation: It is preferred that all vendor equipment residing on the Mangum Regional Hospital network will be segmented onto its own VLAN.	x				see quote
	Remote Displays : HOSPITAL to provide network for remote displays including audio-video transmitters/receivers and cable for connectivity from central stations to the associated remote displays. HOSPITAL will also provide the TV's/Displays and mounts for these remote displays.					
	Server Location: Vendor must provide Network architecture, including all server infrastructure, WAN / LAN requirements, physical location requirements, data flow diagram, and EMR [CPSI] integration, as specified by Mangum Regional Hospital IT staff	x				see quote
Servers	Server Virtualization : Vendor is allowed to utilize hospital's virtual server environment. Vendors must provide access to their software to hospital Clinical Engineering & IT personnel for support.		x		Gateway server quoted as virtual. Mindray . Server install will build 1/2 rack or use existing 1/2 rack.	see quote
	Physical Servers: In the event vendor doesn't support virtualization, vendor is required to provide all servers necessary for the operation and interfacing of their system. This includes redundant servers. Vendors must provide access to their servers & software to hospital Clinical Engineering & IT personnel for support.	x				see quote
	Device Interfacing/Integration : Vendors shall provide licensing for ALL devices included in this RFP to communicate with the electronic medical record.	x				see quote
	Device Software : Vendors shall provide licensing for "unlimited" software updates, for the life of the system, required for interoperability in the event additional items are purchased in the future. This includes monitor, central and server software.	x				see quote
are Licensing	Patient Data Transfer : CONTINUOUS FULL DISCLOSURE RECORD ACROSS ALL DEPTS. System shall provide continuous Full Disclosure record for ALL monitoring devices (telemetry, bedside, wireless), across ALL departments, including those where central monitors are not required in hospital provided specifications. All Full Disclosure records MUST be accessible from any central monitor located on patient monitoring network. This is a site license.	x				see quote
Softw	Remote Access Software : Vendors will provide Remote Access ability from any mobile device or hospital PC, for unlimited users (or as specified in dept tabs), this remote access must be available for ALL quoted bedside monitors, compact monitors, and telemetry. Data to be available to remote users include: Raw Waveforms, Arrhythmia Analysis, Alarms, Custom Trend Creation & Display (Graphical and Tabular), Diagnostic 12 Lead EKG Reports with interpretation, Saved Events, Printed Item Audit Trail (Auto and Manual). Additionally, user must have ability to print the following all required data from any PC connected to the HOSPITAL network. This may be accomplished through a web interface or client application.	x			CMS viewer quoted	see quote
	ADT Integration: Vendor to provide ADT connection to the Mangum Regional Hospital ADT system.	x				see quote
	Barcode Scanning: allows all quoted bedside monitors, compact monitors, transport monitors, and central monitors to utilize hospital provided barcode scanner for patient admission through ADT integration	x				see quote
io	Electronic Strip Export to EMR [CPSI]: All bedside, compact, transport, and central monitors must print electronic waveform strip (pdf) and reports directly to EMR [CPSI] patient folder	x			Print to PDF set up quoted	see quote
Integra	Alarm / Event Notification System : All monitoring devices must be able to transmit alarms to the middleware communication system allowing for alarms to be forwarded on to clinician phones.			x	additional fees might be experienced due to 3rd party requirements.	see quote
	EMR [CPSI] Interface via HL7: This interface allows for transmission of numerics to the EMR [CPSI] system	x				see quote
	Full Disclosure Integration with EMR [CPSI]: Allows vendor's full disclosure application to be opened "in context" within the EMR [CPSI] view a staff member will be accessing.	x				see quote
Test		x				see quote
essional	Vendors will provide a project manager to manage and coordinate all aspects of the project. Please include all costs for design and travel, implementation, and all other associated professional services required for a successful implementation and go-live.	x				see quote
Profe	Vendors will provide project plan with minimal disruption to existing patient monitoring devices until new network goes live.	x				see quote
