Attachments: ATT Fleet Complete- Advanced Tracking.pdf; ATT Fleet Complete- Standard Tracking.pdf

Hi Codi,

Thank you for taking the time to speak with me today! As requested, I've attached two quotes to this email: one for the Standard Tracking option and another for the Advanced Tracking option.

To assist in your decision-making, here's a feature comparison of the two options:

Advanced Tracking Features:

- GPS and time-stamped vehicle location
- Driver behavior reports and dashboards
- Driver Safety Scorecard tracking
- Maintenance tracking based on mileage
- Crash detection
- 20+ engine data points (e.g., RPM, oil/coolant temperature, VIN, brake pedal pressure, fuel economy, odometer readings, etc.)
- Engine diagnostic trouble code (DTC) tracking
- Fuel economy reports
- OBD-II or J1939 9-pin plug-and-play connection

Standard Tracking Features:

- GPS and time-stamped vehicle location
- Driver behavior reports and dashboards
- Driver Safety Scorecard tracking
- Maintenance tracking based on mileage
- Crash detection
- OBD-II or J1939 9-pin plug-and-play connection

Key Difference:

The primary distinction between these options lies in the extensive vehicle and engine data points offered with the Advanced option. These data points provide valuable insights for proactive maintenance. For example, the Advanced option includes a "check engine light" alert, allowing you to generate an engine diagnostic summary remotely. This eliminates the need to send the vehicle to a mechanic solely for diagnosis, saving time and streamlining operations.

Regardless of which option you choose, both solutions provide robust features to enhance fleet management and deliver meaningful benefits to your operations. Feel free to check out our solution in action with these short demo videos: [Check out our new Fleet Complete Demo Videos](#)

I'll follow up with you in January as I promised, but please don't hesitate to reach out if you have any questions or need further assistance in the meantime.

Best,

Keith Valencia
