

# Manor City Council 1<sup>st</sup> Quarterly Report

Committee: Parks Committee and Tree Advisory Board

Starting Date: October 1, 2023

Ending Date: December 31, 2023

## Committee Members:

Sonia Wallace & Aaron Moreno

## Accomplishments

We have successfully worked with Public Works Director Matthew Woodard and street/park superintendent Lance Zeplin and the rest of the staff at Public Works on hosting an Arbor Day event at Timmermann Park. We have had several discussions on a Master Plan for our city parks and have had numerous conversations with our grant writers on what we are eligible for. It was suggested that we have a Master Plan done for our parks and get community involvement on what is wanted in the parks. We have discussed the trail lighting at Timmermann Park as well as park amenities and the Manor Art Park.

## Challenges

Some of the challenges we are facing is the completion of a Master Plan for our parks to narrow down the amenities we want to have. And determining what land is available for park amenities at Timmermann with potential future projects.

## Needs

Continue meeting with city staff and grant writers to complete a park Master plan, park lighting updates, and additional parking at the parks and amenities.

## Next Quarter Goals:

To have enough information and plans to present to the council. We hope to create a regional space that will have others from all over visit.
