BACKGROUND/SUMMARY:

The U.S. Environmental Protection Agency's (EPA) Lead and Copper Rule Revisions (LCRR) went into effect on December 16, 2021. Under the revised rule new compliance and monitoring protocols, school and childcare facility testing, service line inventories, and, if necessary, a lead service line replacement plan, and public education and outreach will be required. The TWDB LSLR program provides low-cost financial assistance for projects and associated activities directly connected to the identification, planning, design, and replacement of lead service lines for compliance with the LCRR.
