

AGENDA ITEM SUMMARY FORM

PROPOSED MEETING DATE: June 18, 2025
PREPARED BY: Scott Moore, City Manager
DEPARTMENT: Administration

AGENDA ITEM DESCRIPTION:

Consideration, discussion, and possible action regarding a letter to support the Travis County Active Transportation Plan 2050 Project.

BACKGROUND/SUMMARY:

Travis County Transportation & Natural Resource's Division is seeking a letter of support for their Transportation Alternatives Set-Aside grant. The grant would assist the division with updating the county's 2050 Transportation Plan 2050 and provide funding to produce a county-wide, interconnected, multi-modal active transportation plan that improves safety, mobility, and access for users of all ages and abilities, with special attention to underserved and vulnerable users. An established county-wide plan is needed to connect the active transportation networks managed by the other municipalities in Travis County, private entities, and non-profit organizations. Having a robust county-wide active transportation network will improve connectivity both within Travis County and between adjacent counties.

The 2050 Transportation Plan 2050 update will incorporate existing active transportation facilities and planned projects by the different local units of government and private entities. The City of Manor will be able to share input with the appointed advisory committee to identify active transportation needs and projects for this eastern section of Travis County to address those needs, including new facilities, gap completion, and improved connectivity for the region.

LEGAL REVIEW: Not Applicable
FISCAL IMPACT: No
PRESENTATION: No
