COMMERCIAL CORRIDOR

Commercial Corridors consist of nonresidential land uses that meet the needs of both local and regional residents. This includes big box stores and multi-tenant commercial or retail uses.

They are typically located along high volume roadways or at high volume intersections and generate large amounts of sales tax revenue.

Commercial corridors often consist of traditional and suburban commercial development with large surface parking lots that front a major roadway or highway.

While it is recognized these corridors rely upon automobile accessibility and exposure, development should seek opportunities to leverage different forms with elements of mixed-use within the non-residential use framework. This introduces walkability for people once they arrive, reducing the number of trips and increasing the area’s appeal as a destination.

This district is especially appropriate for several needs that residents of Manor currently look elsewhere to provide, including:

- Healthcare services, including hospitals.
- Retail and entertainment.
- Specialized facilities that support workforce and skills development, such as information technology, skilled trades and advanced manufacturing.
