

MIXED DENSITY NEIGHBORHOODS

Mixed Density Neighborhoods primarily support a mix of housing options that may consist of one or more of the following housing types from more dense single family homes to small multifamily, with a higher proportion of attached, missing middle, and multifamily products than the Neighborhood category.

The mixed density neighborhood areas are intended to diversify residential areas and allow for infill of different housing types among new or existing single family homes.

This use can serve as an appropriate transition from nonresidential and mixed-use areas to the lower density Neighborhoods.
