

PARKING VARIANCE

The fire department has requested that all fire trucks be able to reach within 150' of the building. This is considered a life safety issue for the Fire Department. 3 parking spaces had to be removed to provide access for the fire truck. The Owner is requesting a variance to allow for the removal of 3 parking stalls. Since the School is a pick up and drop off, the additional parking removal is not anticipated to impact traffic flow or access to the site.
