| Background<br>Information:  | City staff received a request from Enterprise Rent-a-Car to install a business sign on city airport<br>property to better advertise their business. The request did not include an exact sign size at this<br>time, but the request was for a monument type of sign at the airport entrance off MN 19 that<br>was near the maximum allowed by the City. The request indicated something similar to the size<br>of sign that currently exists at the Southwest MN Regional Airport entrance off MN 19. Included<br>in the packet is a visual that was provided by Enterprise. The purpose of the sign request is<br>Enterprise's desire to establish a more concrete retail presence with greater visibility.<br>At their January 2, 2024 meeting, the Airport Commission discussed the request from Enterprise<br>for entrance signage. Much of the feedback from Commission members related to the precedent<br>that would be set if Enterprise is allowed this signage and also how the sign would not match the<br>general aesthetic at the airport. Currently, there is cohesive and intentional signage that follows<br>a specific color regime and design characteristic, including some wayfinding signage, that directs<br>customers around the airport. The Airport Commission voted unanimously against allowing the<br>sign to be installed. |
