Sludge Storage Building Structure (Inside)	\$ 3,966.00
Mobilization	\$ 5,800.00
TOTAL	\$108,407.60

Notes:

- Hiperline to properly prepare the specified structures by using a combination of hydro-blasting with up to 40,000psi water pressure, hand tooling, and hot high pressure washing to remove all existing contaminants, old coatings, and to provide a clean, solid, rough surface to install the SpectraShield Lining System at a minimum thickness of ½ inch on the walls and ceilings. Floors are not to be lined.
- Hiperline to install a stainless deflection plate with four anchors at the owner’s discretion. Owner to provide components.
- If excessive grouting / leak stopping is required (more than 5 gallons or 20 tubes of grout), we will notify customer before proceeding. Additional grouting rates are \$395 per hour for the truck & crew, \$210 per gallon of grout, and \$38 per tube.
- Owner shall be responsible for providing a disposal site, water source, and vac truck as needed.
- Owner is responsible to set up and coordinate all temporary bypassing as necessary to provide a rinsed structure with pumps, rails, and loose electrical removed for the duration of the SpectraShield Lining Process.
- Sanitary structures include our industry leading 10 year warranty, 100 year design life.
- Invoices are Net 30 Days, no retainage. Interest charge of 1.5% per month for invoices over 30 days.
