Notes:

- Hiperline to properly prepare the specified structures, catch as much of the debris as possible to avoid washing it down the pipe, and install the SpectraShield Lining System at a minimum thickness of ½ inch.
- Removing the existing manhole steps is part of the standard process unless noted otherwise.
- If excessive grouting / leak stopping is required (more than 5 gallons or 20 tubes of grout), we will notify customer before proceeding. Additional grouting rates are \$395 per hour for the truck & crew, \$210 per gallon of grout, and \$38 per tube.
- Owner shall be responsible for providing a disposal site, water source, and vac truck as needed.
- Owner to provide any pvc connections, anchors, adaptors, or extensions if needed to achieve a better long term result in regard to the drop pipes. Hiperline will complete the work inside the structures as necessary.
- Owner will provide a large 30 inch flow through plug if needed for the mh near the main LS, this structure might need to be scheduled for off-hours or when the turkey plant is shut down.
- If Hiperline determines a particular structure is too corroded to successfully achieve a long term solution, the owner will be notified and have the option to pay the crew rates listed above per hour at that structure and not install the liner, or to install the liner regardless with a one year warranty to buy time. (This is rare but can happen in highly corroded structures)
- Sanitary structures include our industry leading 10 year warranty, 100 year design life.
- Invoices are Net 30 Days, no retainage. Interest charge of 1.5% per month for invoices over 30 days.
