

City of McCleary

STAFF REPORT

To:	Mayor Miller and Council
From:	Paul Nott
Date:	10/2/2023
Department:	Light and Power

Hello All,

Since our last report the crew has been working on a primary line extension off of McCleary RD. We are ready and scheduling an outage to cut over the new line extension on Foreman Rd. Preparing construction on a pole re location on County Line Rd. As soon as guard rails are placed on the new fish passage bridges, we will be returning them to normal. We have had some vehicle issues that have been addressed.

As we move into October it is the beginning of storm season. We would like to remind everyone to stay away from down power lines. When you experience a power outage be sure to report it, please don't assume that we already know about it as you might be the only one without power. Also, as we get into the colder months it is important to turn off lights and heat until we get the power restored. Leaving on one light as a signal to the power being restored will assist us in getting power restored quicker by shedding the distribution load when we go to re energize so we don't experience cold load pick up situation.

As always, we have been fielding customer requests and doing line maintenance when our crew structure or time allows.

If anyone has any questions or concerns, feel free to contact us...

Paul
