Hello All,

This last month we completed the work for cutover of the Sand Creek area, trimmed some trees in preparation for storm season, line maintenance in numerous areas of the distribution system and customer service work.

After the outage last month at the 12KV substation, we had GHPUD substation crew come and change out the damaged relay, and we are coordinating a time to have them back again to do some maintenance work on the circuit breakers at the substation.

With Sand Creek ready for cutover we have approximately 4 more customers and some rebuild left to do in proximity to the 4KV substation. We have changed our direction and have decided to just have one outage and complete the cut over vs. two separate outages.

Later this month we will be getting everything ready for the holidays.

Have a great Thanksgiving!!

If anyone has any questions or concerns, feel free to contact us…
