City of McCleary

STAFF REPORT

To:	Mayor and Council
From:	Cory Marsh
Date:	10/30/2026
Department:	Public Works

Hello Everyone,

The crew has been working hard completing projects for FEMA, we currently have 1 left that we can complete before the rainy season. One project was extended till April 2027 as this project pertains to us getting certain permits and a open window so we are not disturbing the salmon coming up stream.

As we finish that, we are looking into getting prepared for the rainy season ahead of us which involves ditch cleaning in town and on Simpson Ave and Summit Rd.

We also will be doing our annual valve exercise to keep our water valves operable and our 6-month hydrant flushing.

Starting November 3rd, we will have our first training with IamGIS, all of our data has been sent over and implemented into their system, now we are moving into phase 2. Our goal is to have everyone understand the system and be fully running in the start of 2027.

Just as a reminder to everyone, when we are being hit with a lot of rain, Public Works will have a pallet of sandbags that is available to the public to come grab to help divert water if needed. The pallet will be at the Public Works office in the alley between City Hall and Shell.

If you have any questions, feel free to reach out to me at anytime…

Thank You

Cory Marsh
