| Department: | Light and Power |

Hello All,

Since our last report the crew has responded to 6 outages, began another line extension on Foreman Road, changed out the defective "blue" lights on Third Street and prepared the city with the holiday decorations.

We had 2 major outages, one that affected the entire town, and the second outage affected customers that are served from the 4KV substation. The first one was due to wind that hit East County hard. The windstorm took out a GHPUD substation high side protection which required the PUD to test their equipment prior to reenergizing. While they were completing their testing, we prepared the city for re-energizing and cleared numerous limbs and trees from the power lines. The second outage that affected our 4KV substation was a very similar type of fault. We lost our high side fusing and before we could reenergize, we needed to have the GHPUD substation crew come and test our substation equipment.

2025 by the numbers.
