Hello All,

Since our last report the crew has worked on 3 outages, 2 customer service projects, completed the electrical service at the Lindsay Baum Memorial, 2 danger tree removals, and general line maintenance.

During the city-wide outage, the crew completed returning the fish passage shoe fly's back to normal. It was also a good test of the new outage notification system which worked great, and we have received good feedback from our customers as well.

The 3 outages consisted of the BPA outage, and underground fault on Luscombe, and a failed equipment outage on Mommsen.

Customer service has been a couple of new services, a couple of danger tree removals (1 on Beck Street and 1 on 2nd Street).

We've also upgraded and installed a new electrical service to the Lindsay Baum Memorial.

If anyone has any questions or concerns, feel free to contact us...

Paul
