Department:	Water and Wastewater

Water and Wastewater:

The WWTP has been online now for 19 years. Since the environment in a WWTP is more challenging on the equipment. We have seen some equipment breaking down. Some pumps are being rebuilt; some are being replaced. Fortunately we have an experienced operations team, so we can keep the WWTP working smoothly.

In May of 2013 the Water Treatment plant was brought on-line. That means 11 years that the plant has been operational. Whomever was responsible for making the decisions to implement the treatment for our drinking water, I feel, they made a very good decision.
