Department:	Public Works

Hello Everyone,

During the month of February, the crew has been looking into city ROW's, alley repairs, and meter replacements.

Our list of rereads has grown significantly by faulty meters, ERTS or both. With that plan we will investigate what needs to be replaced to resolve this issue! In February there were no water leaks.

With our city right of ways, the crew has done some shoulder repair on N 8th street by removing mud and grass grown on sidewalks and onto the street. We are currently wanting to repair/ clean up the shoulder by the library, just waiting for decent weather!

Back in January we started tearing up the alley from 10th street and working towards 5th street to repair those major potholes for school transportation, that project is still currently being worked on as this will take some time.

The City of Elma came in and swept our streets for us, and we are working on a schedule for them to come in and keep our streets clean so thank you to them!

If you have any questions, feel free to contact me.

Thanks
