

City of McCleary  
**STAFF REPORT**

<b>To:</b>	Mayor Miller and City Council
<b>From:</b>	Kevin Trehwella
<b>Date:</b>	March, 2026
<b>Department:</b>	Water and Wastewater

**Wastewater:**

Rain brings hundreds of thousands of gallons of extra water into the treatment plant. All those extra gallons cost to treat.

We are still waiting for the grants to locate all the problems in our sewer system.

After we locate all the problems that are causing all the rainwater and groundwater to come in, we will then apply for a grant to fix the problems.

Public works just completed repairing a broken waterpipe, at the WWTP.

We had to replace a touch screen for SBR Controls. We were able to get that replaced very affordably. When we opened the notebook which has all the technical data on the SBR operating system and was supposed to have the operating disk.

Unfortunately, there was a note on the disk holder that says, "Glen has the disk".

Fortunately, Technical Systems Inc. (TSI) has agreed to come over and help us get the program on the new touchscreen.

Water plant is running flawlessly.
