McCleary City Council Position

I am applying for this position because I feel I can bring a fair, non-bias opinion on assisting with handling the affairs of the city's budget and needs. I have good problem-solving skills and have worked with small and large groups to address the concerns at hand and complete the task in a very timely manner. My job also involved interactions with attorneys in reaching an agreement involving a property settlement. I have also had interactions with attorneys on many occasions to resolve auto property settlements. I also had authorization to handle unlimited check writing authority prior to converting to automated check distribution. So, in short, I have had a diverse exposure to dealing with problem solving, time lines, cost concerns and reaching fair and reasonable settlements or conclusions to the issues at hand. I have also invested time in making improvements to the Train Pavilion, helping with the local food bank. I have an invested interest in trying to help make this town better for the current and future families.
