HPE Support Renewal Contract Re-Approval Request

At the last Council meeting, Council approved the HPE server and storage support renewal contract through Right! Systems, Inc. However, after approval, I was notified by Right! Systems, Inc., that the quoted pricing had expired in July and is no longer valid. The original quote was dated June 4, 2026, and carried an expiration date of June 14, 2026.

Right! Systems, Inc. has provided an updated quote and is requesting approval as soon as possible so that support coverage can be renewed without further delay. The revised quote reflects an increase of **\$844.35** over the previously approved amount.

I apologize for the inconvenience of bringing this item back before Council. This situation has been frustrating, as the original approval was obtained in good faith based on the pricing available at that time. Unfortunately, because the vendor's pricing expired and has since been updated, Council action is required to authorize the revised expenditure.

Recommended Action:

Approve the updated quote from Right! Systems, Inc. for the HPE support renewal at the revised cost, reflecting an increase of **\$844.35** over the previously approved amount.

Best Regards,

Dalyn Beaulieu
