| Re-Occurring Projects (As Funded) | |
|---|--|
| Pavement Overlay Program- To protect the city's investment in its roadway system, regular maintenance is required. One of the maintenance components includes providing overlays to extend the life of the street surface and protect the roadway base. The ideal program would provide \$412,500 per year of overlay work at various street locations. The locations are currently determined by the pavement management system provided by the TIB. Currently, the city does not have a set budget per year and applies for grants from the Transportation Improvement Board (TIB). The City currently has 9.5 miles of roadway that we are responsible for the pavement. If pavement overlays were on a 20 year rotation, we would be paving about 2,500 feet a year. At current cost for installation of asphalt, that cost is \$412,500 a year. | |
| Alley Reconstruct and Pavement Patching (annual cost) - Various locations. Develop an annual program to reconstruct and overlay alleys and roadway pavement patching to reduce maintenance costs. | |
| Crack Seals - Various locations. Develop an annual crack seal program to preserve the City investment in newly constructed and overlaid roads. | |
| Sidewalk Trip Hazard Elimination - Trip hazards in the existing sidewalk system will be systematically repaired through either removal of affected sidewalk panels, removing the cause of the problem, and re-pouring the panels, or by grinding the problem areas and resurfacing the affected areas. | |
| Inactive: Chip Seals - Various locations. Develop an annual chip seal program to preserve the City investment in newly constructed and overlaid roads. | |
