## STAFF REPORT

<b>To:</b>	Mayor Elect Huff and Council
<b>From:</b>	Paul Nott
<b>Date:</b>	11/25/2025
<b>Department:</b>	Light and Power

Hello All,

Since our last report the crew has responded to 4 outages, replaced a couple more poles, and general maintenance. This week and next we will be prepping and hanging the Christmas decorations throughout town and decorating the train in the park.

The outages this month were, a bald eagle flew into the primary on Larson Road knocking out the power, 2 different trees at different times fell into the primary on County Line Rd and a faulty connector that fed McConkey Rd. On the McConkey Road outage we were able to contact the customers who have opted for OUTIFI and let them know that we needed to have an outage to make the repair.

Poles that are being replaced are old poles and this work is improving our infrastructure.

Once again storm season is right around the corner. We would like to encourage everyone to be prepared for power outages before they occur and please practice power outage safety.

If anyone has any questions or concerns, feel free to contact us...

Paul
