1. Summary of the proposed ordinance (must include a statement of the public purpose, such as serving the public health, safety, morals and welfare):

The lack of details in the fence section of the Madeira Beach Land Development Regulations (LDRs) has caused confusion and frustration for various homeowners, contractors, city staff, and applicants attempting to obtain a fence permit. Some of these issues include many common prefabricated open fence types not meeting current open fence sizing and spacing requirements, fencing requirements in other code sections not being referenced in the fence division, and a lack of clear black-and-white guidance when it comes to fences. The current code is also silent on some fence types such as temporary construction fencing and split rail fences. While this section of the code already has a definition for “building line” as being established by the primary structure setback, this definition is not referenced at all in this code. Due to not being referenced, the lack of a clear definition of where the side, rear, and front yards begin, when determining height, city staff is forced to interpret it as the building line of the primary structure that exists at the time of permitting. Because of this, applicants whose structures do not extend as far as the minimum setback requirements are penalized, applicants with nonconforming structures built beyond the setbacks are rewarded and fence lines are inconsistent from property to property within the same zoning district. As a result, some applicants have had their neighbors apply for their fence permits to extend further than they typically would be able to.

No foreseen impact.
