

Memorandum

Meeting Details: January 22, 2025

Prepared For: Mayor & Board of Commissioners

From: Megan Wepfer, Public Works Director

Subject: Public Works / Satellite Building Department Design

Background

The public works department is bringing a proposal to the Board of Commissioners for the design of a new public works facility that will incorporate a satellite office for the building department and the possibility of adding training facilities for the fire department. Currently the Public Works department is working out of a shed that was constructed over 20 years ago and is open to all elements and the mechanic and sanitation employees are housed off the island. The proposed new building will be 135ft by 55ft and will have a second story office and break area and multiple bays which will bring the mechanic back to the island and allow us to downsize on rental space.

The proposal for engineering services is broken down into two tasks. Task one covers all geotechnical investigation which includes boring samples to check the soil type for which foundation will be needed. Task two covers all construction documents, permitting services, Construction administration services, and project certifications. Items that will not be covered by task two are Boundary and topographic survey, traffic studies, design of roadway improvements, Lift station design, FDOT permitting, and public hearings.

Fiscal Impact

The fiscal impact for the engineering services is \$62,050.00. Between the Public Works Department and the building department FY25 has \$1.5 million budgeted towards the design and construction of the new facility.

Recommendation(s)

Staff recommends the Board of Commissioners approve the engineering proposal with Pennoni for the Public Works building in the amount of \$62,050.00.
