

Patron complaint received at City Hall July 20, 2026:

The individual expressed concern that menstrual hygiene products are available in the men's restroom while the urinal area remains open. His concern was that, if the library's intent is to encourage patrons to use the restroom that best aligns with their needs, individuals using the urinals may have an expectation of greater privacy than the current layout provides.

Recommendation/Action from Library Advisory Board meeting July 22, 2026:

Men's Restroom Privacy

Recommend adding menstrual hygiene products inside stalls in addition to original location in library restrooms. Motion made by Mentzer, Seconded by Eritano. Passed unanimously.
