

MICHLUG, founded in 2000, is a club of passionate LEGO fans that enjoy exhibiting their creations for public enjoyment.

We offer many different options which can be tailored to your specific needs:

1) City Exhibit: The classic way we started - 10" x 10" Modular sections of roads and buildings that can be arranged to fit the desired area. Trains can also be provided.

2) MOC Table: My Own Creations aka MOCs, is a catch-all term for any creation from a LEGO builder. Sculptures, Spaceships, and possible figures are just some of the MOCs MICHLUG has exhibited before. Offerings are subject to the MICHLUG members participating in the event.

3) Play table: We provide a large pile of parts and let the attendees create and play. We do offer attendees the option to buy something they have made, if permitted by the venue.

4) Sales table: One of our most popular attractions, the sales table often offers bulk LEGO and buildable minifigs for attendees to buy.

5) Bespoke exhibit: If the aforementioned does not meet aspirations you have, a custom exhibit may be possible and in-depth discussion is required to properly understand if your needs can be met.

In all circumstances:

A) We need to know if power will be provided, as items like trains can be power-dependent.

B) We need to know if tables will be provided (and what size they are) or if we will need to bring our own.

C) We need to understand the security of the environment, such as security personnel, barriers, and the ability to secure the location when members are off-site (such as a multi-day show). At least one member will be present during the open hours of the show, but in the case of multi-day shows, we all leave after close and come back early the following day, before the public is let in.
