RE: T-Mobile Coverage Improvements in the City of Medina

Dear Mayor Rossman and Council Members:

We are pleased to present T-Mobile's plan to improve its wireless communications network in the City of Medina.

Attached is a presentation summary of the proposed service improvements that was provided to City staff last month. The proposed upgrades are designed to substantially improve the coverage and capacity of T-Mobile's network by upgrading and collocating on existing wireless facilities, without the need to construct any new towers.

The service improvements will provide several important benefits to the City:

- Improved coverage that will support reliable wireless services for Medina residents;
- Access to the latest wireless 5G technology;
- Substantial improvements to network capacity that enable home broadband internet service; and
- High-quality upgrades to existing infrastructure that are designed to blend into the surrounding settings.

T-Mobile is planning to submit applications for upgrades to two existing tower sites (Overlake Golf Course and Bellevue Christian School) in the next few weeks, with both proposals including state-of-the-art "mono-pine" camouflage designs with excellent branch density. We welcome your feedback and look forward to partnering with the City to ensure residents have access to the latest wireless technology and services.

If you have any questions or comments, or would like to learn more about T-Mobile's service, feel free to contact me at (408) 314-1398 or matt.russo4@t-mobile.com.

Sincerely,

A handwritten signature in black ink, appearing to read 'Matt Russo'.
