Subtitle 16.00. INTRODUCTION TO THE UNIFIED DEVELOPMENT CODE

16.00.010. Title. *(no changes needed)*

16.00.020. Statement of purpose.

- A. The UDC is a comprehensive set of regulations that governs the physical development of all land and water within the City of Medina, except where state-owned properties are exempt under state law, for the purpose of orderly development within the community. The UDC consolidates the city's zoning, platting, environmental, construction and other development regulations into a one-book source with the goal of providing consistency between different regulations, and making the ability to find information related to development easier.

- B. The primary purpose of the regulations under this title is to:
 - 1. Encourage and guide development consistent with the goals, policies and intent of the Medina comprehensive plan;
 - 2. Protect the community's single-family residential nature and the natural aesthetic quality of the community;
 - 3. Address both natural and manmade environmental considerations as part of the project permitting processes;
 - 4. Protect the public's health, safety and welfare as a whole and not create a duty of protecting any person or class of persons; and
 - 5. Provide appropriate procedures for enforcement of the regulations of this title.

1. *Very low*. The chance of the failed tree or branch impacting the specific target is remote;
2. *Low*. It is not likely that the failed tree or branch will impact the target;
3. *Medium*. The failed tree or branch may or may not impact the target, with nearly equal likelihood; or
4. *High*. The failed tree or branch will most likely impact the target.

In evaluating the likelihood of impacting a target, the occupancy rate of the target and any factors that could affect the failed tree as it falls towards the target shall be used in determining the likelihood of impact.

16.21.040. Accessory uses.

- A. Accessory uses listed in Table 16.21.030 and elsewhere in the UDC are allowed consistent with MMC 16.21.020 and Table 16.21.030.
- B. Accessory uses not listed in Table 16.21.030 or elsewhere in the UDC may be allowed provided the director determines the accessory use is customary and incidental to the principal use.
- C. Except where expressly provided for otherwise in Table 16.21.030, accessory uses shall be permitted the same as the principal use. The director may waive this for an accessory use established after the time the principal use is established involving a "SU," "CU" or "H" from the table if:
 - 1. The principal use complies with the permit requirement in Table 16.21.030;
 - 2. The accessory use is within the scope and intent of the original permit as determined by the director; and

(Code 1988 § 20.21.040; Ord. No. 933 § 5, 2016; Ord. No. 900 § 4 (Att. A), 2013)

16.21.050. Similar uses. *(no changes needed)*

16.21.060. Maximum dwelling units on a lot.

A. Where Table 16.21.030 authorizes dwelling uses, the maximum unit density per lot is limited to two units, except one additional dwelling unit that is an accessory dwelling unit meeting the requirements set forth in MMC 16.34.020 may be allowed on the same lot.

B. The density requirements set forth in subsection “A” above does not permit middle housing to be development in the following areas:

1. Portions of a lot, parcel, or tract designated with critical areas designated under RCW 36.70A.170 or their buffers as required by RCW 36.70A.170, except for critical aquifer recharge areas where a single-family detached house is an allowed use provided that any requirements to maintain aquifer recharge are met.

2. A watershed serving a reservoir for potable water if that watershed is or was listed, as of July 23, 2023, as impaired or threatened under section 303(d) of the federal clean water act (33 U.S.C. Sec. 1313(d))

C. The standard of 16.21.060(A) does not apply to lots after subdivision below 1,000 square feet. These lots shall only permit one dwelling unit per lot, except additional dwelling units may be allowed on the same lot for the uses stated in 16.21.060 (A)(1) & (A)(2).

(Code 1988 § 20.21.060; Ord. No. 932 § 7, 2016)

CHAPTER 16.22. LOT DEVELOPMENT STANDARDS

16.22.010. Purpose. *(no changes needed)*

16.22.020. Lot development standards.

- A. The pertinent requirements for minimum net lot area, minimum lot width, and minimum street frontage applicable to each lot is determined by the zoning district in which the lot is located and the corresponding standards in Table 16.22.020.

Table 16.22.020: Lot Development Standards

Zoning District	Minimum Net Lot Area	Minimum Lot Width	Minimum Street Frontage
R-16	16,000 sq. ft.	70 ft.	70 ft.
R-20	20,000 sq. ft.	70 ft.	70 ft.
R-30	30,000 sq. ft.	90 ft.	90 ft.
SR-30	30,000 sq. ft.	90 ft.	90 ft.
N-A	16,500 sq. ft.	135 ft.	135 ft.
Public	None	None	None

- B. The lot width is determined by calculating the average horizontal distance between the side lot lines where the building envelope is located. If a lot has an irregular shape (i.e., less than two side property lines) or is a corner lot, lot width is determined by calculating the average horizontal distance between the longer dimensional lot lines where the building envelope is located.
- C. The street frontage is determined by measuring the distance of the property line adjoining a street subject to the following conditions:
1. Where a lot lies outside the curve of a street or private lane in such a manner as to have a property line curved inward such as a cul-de-sac, the street frontage is determined by calculating the average width of the lot measured parallel to the chord of the arc of such frontage over the depth of such lot or the first 150 feet thereof, whichever is less (see Figure 16.22.020);

Figure 16.22.020: Curved Street Frontage

2. Where a lot has a property line adjoining more than one street, the street frontage is determined using the property line adjoining the greater street length;
 3. The requirements for street frontage shall not apply to flag lots, or lots located at the terminal end of a street or private lane provided emergency vehicle access and turnaround requirements are met; and
 4. The requirements for street frontage for lots fronting on a private lane are prescribed in Chapter 16.91 MMC.
- D. In the R-20 and R-30 zones, where a single lot contains high bank steep slopes and has more than the minimum net lot area required in Table 16.22.020, the lot may be divided to create two lots with one or both lots having less than the required minimum net lot area provided:
1. Lots adjoining the single lot being divided are owned and/or controlled by a person or entity different than the owner of the subject single lot being divided;
 2. No more than two lots result from the division;
 3. Each lot has at least the greater between 85 percent of the minimum net lot area required by the zoning district in which the lot is located, or 16,000 square feet;
 4. There is a difference in elevation of at least 25 feet between the average elevations of the area within the building envelope of each lot;
 5. Restrictive covenants are recorded on each lot that state:
 - a. No structure or building on (insert legal description of the lot with the higher average elevation here) shall be placed in a manner where the elevation of the lowest point of the foundation above the ground surface is less than the elevation of the highest point

of an existing or future structure or building on the lot with the lower average elevation;
and

- b. No structure or building on (insert legal description of the lot with the lower average elevation here) shall be placed in a manner where the elevation of the highest point of an existing or permitted future structure exceeds the elevation of the lowest point of the foundation above the ground surface on the building or structure on the lot with the higher average elevation; and
6. A nonadministrative variance is approved pursuant to MMC 16.72.030, except the conditions set forth in subsections (D)(1) through (5) of this section shall be used in deciding the variance.

(Code 1988 § 20.22.020; Ord. No. 969 § 3 (Exh. A), 2019; Ord. No. 900 § 4 (Att. A), 2013)

16.22.030. Building and structure setbacks.

- A. Table 16.22.030 establishes the minimum distance required for any part of any building or structure to be set back from the pertinent property line. The minimum setback requirements are applied to each lot by the square footage of the lot area and the corresponding setback standards in the table. (See definition of "lot area" and the definitions of "property lines" in Chapter 16.12 MMC and Figures 16.22.030(B) and (C) for establishing and delineating setbacks.)

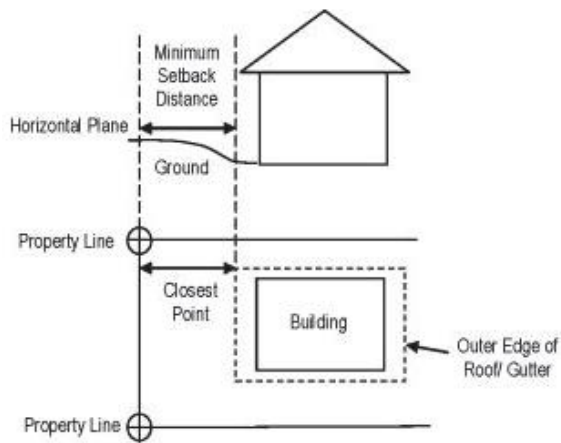

Table 16.22.030: Minimum Building/Structure Setbacks

Square Footage of the Lot Area	Minimum Setback from the:			
	Front Property Line	Rear Property Line	Side Property Line	Lake Washington Shoreline
Less than 10,001	25 feet	25 feet	10 feet	See MMC 16.63.030
From 10,001 to 13,000	26 feet	26 feet		
From 13,001 to 15,000	28 feet	28 feet		
From 15,001 to 20,000	30 feet	30 feet		

Greater than 20,000	30 feet	30 feet	The greater of 10 feet or 15% of the lot width; not to exceed 20 feet	
---------------------	---------	---------	---	--

- B. Setbacks are measured as the distance between the property line and the closest point of any part of the building or structure to the property line, including but not limited to architectural elements, roof eaves, gutters and mechanical equipment. (See Figure 16.22.030(A).)
- C. To determine compliance with the setback standards in Table 16.22.030, the setback is measured along a horizontal plane consistent with subsection (B) of this section.
- D. Where a lot adjoins a private lane and has less than 30 feet of public street frontage, the front, rear and side property lines shall be determined as follows, except as provided in subsection (E) of this section:
 - 1. The side property lines shall generally correspond to the long dimension of the lot;
 - 2. The front and rear property lines shall generally correspond to the shorter dimensions of the lot;
 - 3. If the dimensions of the lot form a square, the applicant may elect to designate the front property line with the rear and side property lines designated consistent with the definitions in Chapter 16.12 MMC.
- E. Where a lot adjoining a private lane or at the terminal end of the street has a condition where the orientation of the dwelling on the lot, or the orientation of dwellings on adjacent properties, logically suggests setbacks that do not correspond to the longer and shorter dimensions of the lot, the setbacks shall be established using the logical orientation rather than the dimensions of the lot.
- F. In addition to the setbacks prescribed by this section, if a lot adjoins a private lane, a setback from the private lane easement is required pursuant to MMC 16.91.060.

- C. The total maximum structural coverage and impervious surface area allowed on a lot within the parks and public places and the neighborhood auto zones shall be pursuant to the special use provisions specified for uses within those zones. However, where structural coverage or impervious surface maximums are not specified under the special use provisions, the structural coverage and impervious surface area maximum for the R-20 zone in Table 16.23.020(B) shall apply as applicable.
- D. The maximum structural coverage and maximum impervious surface area allowed on a lot is determined by multiplying the square footage of the lot area by the corresponding structural coverage and impervious surface area maximum percentages specified in Tables 16.23.020(A) and (B) for the zone in which the lot is located (e.g., a 16,000 square foot lot zoned R-16 may have a maximum of 4,000 square feet ($16,000 \times 0.25 = 4,000$) structural coverage and 8,800 square feet ($16,000 \times 0.55 = 8,800$) impervious surface area per Table 16.23.020(A)).

 - 1. Table 16.23.050(A) establishes the maximum height standards for buildings and structures within each zone.
 - 2. Areas not identified in Table 16.23.050(A) are subject to the height standards specified for the R-20/R-30 zone.

3. Where Table 16.23.050(A) specifies eligibility for a height bonus, a property owner may elect to apply the height standards in subsection (C) of this section in lieu of the height standards in Table 16.23.050(A); provided, that:
 - a. The total structural coverage on the lot does not exceed 13 percent, excluding the structural coverage bonus set forth in MMC 16.23.040; or
 - b. If the lot area is 16,000 square feet or less, the total structural coverage on the lot does not exceed 17½ percent, excluding the structural coverage bonus set forth in MMC 16.23.040.
