

MIBC Marina Renewal

Today

- Most of the current Marina is 60+ years old.
- Wooden marina is structurally at end of life.
- Current design is not compliant with new City and Gov't regulations.
- Increased boat dimensions (max of 25' long) need different slip configuration.

Proposed

- New Marina designed to be compliant with City and Gov't regulations.
- Solid surfaces will be replaced with light penetrating decking.
- Safer design for swimmers and boaters with separation of swim dock and marina.
- Same number of boat slips will be in the new marina as in current design.
- No increase in number of members
