3. *Minimum parking requirements.* Parking proposals must demonstrate to the satisfaction of the City Engineer that the number of parking spaces proposed will accommodate the projected parking created by the proposed use. The City Engineer may condition approval to require a minimum number of parking spaces if the proposed use is expected to create demand for additional parking spaces beyond existing and proposed onsite parking facilities.

G. *Impervious Surface.*

1. No net new impervious surface in the parks system is permitted unless it has been included in an adopted Park Master Plan (or similar planning document that includes a public process and City Council approval, such as the PROS Plan and Capital Improvement Program), the City of Mercer Island Americans with Disabilities Act (ADA) Plan, or specifically exempted by this section, and stormwater and other applicable requirements are met. H. *Lighting.*

1. *General Requirements.* All exterior lighting shall be designed to minimize glare, sky glow, and light trespass onto neighboring properties. Fixtures must be fully shielded and installed in a manner that prevents light trespass beyond the property line of the property on which they are located. Fully shielded means a light fixture constructed and installed in such a manner that all light emitted, either directly from the lamp or a diffusing element, or indirectly by reflection or refraction from any part of the fixture, is projected below the horizontal plane through the fixture's lowest light-emitting part. Lighting must be designed to maintain adequate illumination for pedestrian safety, visibility, and compliance with Crime Prevention Through Environmental Design (CPTED) principles.
2. *Exemptions.* The following lighting types are exempt from the requirements in subsection (H)(1):

- a. Lighting fixtures existing prior to the effective date of this section and the repair of the same.
  - b. Emergency lighting.
  - c. Pathway and landscaping lighting fixtures producing less than 200 lumens per fixture.
  - d. Temporary seasonal lighting.
  - e. Lighting required by state or federal law.
3. *Ecological and Low-Impact Lighting Standards.* New lighting shall adhere to ecological lighting principles, including Dark Sky and, where applicable, salmon-friendly design practices, to minimize environmental and wildlife disruption, while ensuring visibility and safety needs are met.
- a. Eliminate lighting not required for wayfinding, operational use, or public safety to reduce ambient light pollution.
  - b. In addition to the general shielding requirements in subsection (H)(1), fixtures in or near environmentally sensitive areas (e.g., shorelines or riparian buffers) must be positioned to avoid direct illumination of water bodies, shoreline vegetation, or adjacent properties. Compliance must be demonstrated through photometric plans and manufacturer cut sheets.
  - c. Timers and motion sensors may be used outside of primary circulation areas or in low-traffic zones. In active-use areas, fixtures shall maintain continuous illumination during operational hours unless an alternate lighting plan is approved by the code official.
  - d. Light levels should not exceed 3.0 foot-candles for walkways and 5.0 foot-candles for entrances, and high-traffic multi-use trail intersections, unless otherwise approved by the code official.
  - e. Warm color temperature fixtures (3000K or less) should be used to minimize blue light impacts. Higher color temperatures may be used where needed for visibility or safety, provided all other shielding and glare control standards in this section are met.

I. *Lighting for Outdoor Performance, Sport and Recreation Facilities, and Play Fields.*

- 1. Lighting levels for outdoor performance areas, sport and recreation facilities, and play fields shall not exceed by more than five percent the Illuminating Engineering Society of North America (IESNA) published standards for the proposed activity.
- 2. Where playing fields or other special activity areas are to be illuminated, lighting fixtures shall be mounted, aimed, and shielded so that their beams fall within the primary playing area and immediate surroundings, and so that no direct illumination is directed off the site.

3. Lighting shall be turned off as soon as possible after the conclusion of an event and shall not remain on for more than 30 minutes following its end.
4. All lighting shall be equipped with timers to automatically extinguish lights, ensuring that facilities are not illuminated when not in use.
