ENVIRONMENTAL CHECKLIST

PURPOSE OF CHECKLIST

The State Environmental Policy Act (SEPA), chapter 43.21C RCW, requires all governmental agencies to consider the environmental impacts of a proposal before making decisions. An environmental impact statement (EIS) must be prepared for all proposals with probable significant adverse impacts on the quality of the environment. The purpose of this checklist is to provide information to help you and the agency identify impacts from your proposal (and to reduce or avoid impacts from the proposal, if it can be done) and to help the agency decide whether an EIS is required.

PRE-APPLICATON MEETING

A pre-application meeting is used to determine whether a land use project is ready for review, to review the land use application process, and to provide an opportunity for initial feedback on a proposed application. Some land use applications require a pre-application – in particular: short and long subdivisions, lot line revisions, shoreline permits, variances, and critical area determinations. The City strongly recommends that all land use applications use the pre-application process to allow for feedback by City staff.

Please note: pre-application meetings are held on Tuesdays, by appointment. To schedule a meeting, submit the meeting request form and the pre-application meeting fee (see fee schedule). Meetings must be scheduled at least one week in advance. Applicants are required to upload a project narrative, a list of questions/discussion points, and preliminary plans to the Mercer Island File Transfer Site one week ahead of the scheduled meeting date.

SUBMITTAL REQUREMENTS

In addition to the items listed below, the code official may require the submission of any documentation reasonably necessary for review and approval of the land use application. An applicant for a land use approval and/or development proposal shall demonstrate that the proposed development complies with the applicable regulations and decision criteria.

- A. Completed pre-application.
- B. **Development Application Sheet.** Application form must be fully filled out and signed.
- C. **Development Plan Set.** Please refer to the Land Use Application- Plan Set Guide in preparing plans.
- D. **Title Report.** Less than 30 days old.
- E. SEPA checklist.

INSTRUCTIONS FOR APPLICANTS

This environmental checklist asks you to describe some basic information about your proposal. Governmental agencies use this checklist to determine whether the environmental impacts of your proposal are significant, requiring preparation of an EIS. Answer the questions briefly, with the most precise information known, or give the best description you can.

You must answer each question accurately and carefully, to the best of your knowledge. In most cases, you should be able to answer the questions from your own observations or project plans without the need to hire experts. If you really do not know the answer, or if a question does not apply to your proposal, write "do not know" or "does not apply." Complete answers to the questions now may avoid unnecessary delays later. Some questions ask about governmental regulations, such as zoning, shoreline, and landmark designations. Answer these questions if you can. If you have problems, the governmental agencies can assist you. The checklist questions apply to all parts of your proposal, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. The agency to which you submit this checklist may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

USE OF CHECKLIST FOR NONPROJECT PROPOSALS

For nonproject proposals complete this checklist and the supplemental sheet for nonproject actions (Part D). The lead agency may exclude any question for the environmental elements (Part B) which they determine do not contribute meaningfully to the analysis of the proposal. For nonproject actions, the references in the checklist to the words "project," "applicant," and "property or site" should be read as "proposal," "proposer," and "affected geographic area," respectively.

BACKGROUND Α. 1. Name of proposed project, if applicable: Mercer Island Shell. Remove and replace fuel system and fuel canopy 2. Name of applicant: John H. Tyron Pacific Environmental Service Company (PESCO) Robert R. Hanford, LHG Aspect Consulting, LLC (Aspect) 3. Address and phone number of applicant and contact person: PESCO - 8585 Highway 20 PO. Box 2049, Port Townsend, WA 98368 Aspect - 350 Madison Ave. North, Bainbridge Island, WA 98110 4. Date checklist prepared: 7/9/2020 revised 3/5/2021 5. Agency requesting checklist: City of Mercer Island 6. Proposed timing or schedule (including phasing, if applicable): Spring/summer 2021

7.	Do you have any plans for future additions, expansions, or further activity related to or connected with this proposal? If yes, explain: No
8.	List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal: Remedial Investigation and Feasibility Study Report, Mercer Island Shell Service Station, Puget Environmental 1/20/2020
	PLIA Letter concurrence with RI/FS prepared by Puget Environmental 4/20/2020 Interim Remedial Action Workplan to be prepared by Aspect.
9.	Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain: No
10.	List any government approvals or permits that will be needed for your proposal, if known: Permit from City of Mercer Island
11.	Give brief, complete description of your proposal, including the proposed uses and the size of the project and site. There are several questions later in this checklist that ask you to describe certain aspects of your proposal. You do not need to repeat those answers on this page. (Lead agencies may modify this form to include additional specific information on project description.) Remove and replace fuel system and canopy. Perform an independent interim remedial action to excavate petroleum impacted soil which may include dewatering activities and treatment of impacted water. Estimate of contaminated soil is approximately 1,500 cubic yards.
12.	Location of the proposal. Give sufficient information for a person to understand the precise location of your proposed project, including a street address, if any, and section, township, and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic map, if reasonably available. While you should submit any plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit applications related to this checklist. 7833 SE 28th St. Mercer Island, WA 98040 Parcel # 545230-0380

B.	ENVIRONMENTAL ELEMENTS
1.	Earth Constal description of the site (sheek ana)
	a. General description of the site (check one):
	Flat Rolling Hilly Steep slopes Mountainous Other
	b. What is the steepest slope on the site (approximate percent slope)?2% slope
	2 /0 Slupe
	c. What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them and note any agricultural land of long-term commercial significance and whether the proposal results in removing any of these soils.
	Silty Sand to Sandy Silt with Gravel
	d. Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe.
	 e. Describe the purpose, type, total area, and approximate quantities and total affected area of any filling, excavation, and grading proposed. Indicate source of fill. 2,000 square feet, reuse of existing soil if reuse criteria is met and imported pea gravel. Imported fill TBD for remedial excavation.
	f. Could erosion occur as a result of clearing, construction, or use? If so, generally describe. No
	g. About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)?
	No change
	h. Proposed measures to reduce or control erosion, or other impacts to the earth, if any: N/A
2.	Air

	a.	What types of emissions to the air would result from the proposal (i.e., dust, automobile, odors, and industrial wood smoke) during construction, operation, and maintenance when the project is completed? If any, generally describe and give approximate quantities if known.
	b.	Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe.
	C.	Proposed measures to reduce or control emissions or other impacts to air, if any:
•	Wat	
	a. No	 Surface: Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into.
	No	ii. Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans.
	N/A	iii. Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material.
	No	iv. Will the proposal require surface water withdrawals or diversions? Give general description, purpose, and approximate quantities if known.
	No	v. Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.
	110	

	vi.	Does the proposal involve any discharges of waste materials to surface waters? If s describe the type of waste and anticipated volume of discharge.
No		
	Crou	und
b.	Grou	Will groundwater be withdrawn from a well for drinking water or other purposes? If give a general description of the well, proposed uses and approximate quantiti withdrawn from the well? Will water be discharged to groundwater? Give gene description, purpose, and approximate quantities if known.
		ay be required during excavation. Dewatering will likely make use of a temporary sump at the bottom of the excavat lewatering operations will be stored in temporary tanks and treated as required.
	ii.	Describe waste material that will be discharged into the ground from septic tanks or oth sources, if any (for example: Domestic sewage; industrial, [containing the following chemicals]; agricultural; etc.). Describe the general size of the system, the number such systems, the number of houses to be served (if applicable), or the number of anim or humans the system(s) are expected to serve.
N/A		
C.	Wat i.	er runoff (including stormwater): Describe the source of runoff (including stormwater) and method of collection a disposal, if any (include quantities, if known). Where will this water flow? Will this war flow into other waters? If so, describe.
NO		
	ii.	Could waste materials enter ground or surface waters? If so, generally describe.
No		
d.		posed measures to reduce or control surface, ground, runoff water, and drainage patteracts, if any:
Includ	ed in S	stormwater Pollution and Protection Plan
Plan	its	
a.	Chec	ck types of vegetation found on the site Deciduous tree: Alder, Maple, Aspen, other Evergreen tree: Fir, Cedar, Pine, other Shrubs
		Grass

		Pasture
		Crop or grain
		Wet soil plants: Cattail, buttercup, bulrush, skunk cabbage, other
		Water plants: Water lily, eelgrass, milfoil, other
	П	Other types of vegetation
b.	Wha	at kind and amount of vegetation will be removed or altered?
None		
c.	List	threatened or endangered species known to be on or near the site.
N/A		
d.	Pro	oosed landscaping, use of native plants, or other measures to preserve or enhance vegetation
•		he site, if any:
None		
e.	List	all noxious weeds and invasive species known to be on or near the site.
None		an noxious weeks and invasive species known to be on or near the site.
-		
Δni	ımaıç	
	<mark>imals</mark> Stat	e any birds and animals which have been observed on or near the site or are known to be on
. Ani a.	Stat	e any birds and animals which have been observed on or near the site or are known to be on ear the site. Examples include:
a.	Stat or n	ear the site. Examples include:
a. Biro	Stat or n ds: ha	ear the site. Examples include: wk, heron, eagle, songbirds, other:

Examples include: wk, heron, eagle, songbirds, other: s: deer, bear, elk, beaver, other: s, salmon, trout, herring, shellfish, other: een observed any threatened or endangered species known to be on or near the site. ee site part of a migration route? If so, explain.

e. None	List any invasive animal species known to be on or near the site.
	gy and natural resources
a. N/A	What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to mee completed project's energy needs? Describe whether it will be used for heating, manufacturetc.
b.	Would your project affect the potential use of solar energy by adjacent properties? generally describe.
No	
C.	What kinds of energy conservation features are included in the plans of this proposal? List
N/A	proposed measures to reduce or control energy impacts, if any:
11//	
	conmental health Are there any environmental health hazards, including exposure to toxic chemicals, risk of
a.	and explosion, spill, or hazardous waste that could occur as a result of this proposal? describe.
Environm	ental health hazards exist in soil and groundwater from petroleum hydrocarbons and gasoline additives. Risk of fire, explosion,or spills are considered
Gasoli	i. Describe any known or possible contamination at the site from present or past uses. ne-diesel-and oil-range petroleum hydrocarbons from service station activities.
	ii. Describe existing hazardous chemicals/conditions that might affect project develop and design. This includes underground hazardous liquid and gas transmission pipe located within the project area and in the vicinity.
Current	t underground gasoline and diesel storage tanks to be removed following UST decommissioning guidelines. All utilities
	I AND DIOTECTED OF TEMOVED AND TENIACED AS DECESSARY
	d and protected or removed and replaced as necessary.
	iii. Describe any toxic or hazardous chemicals that might be stored, used, or produced d the project's development or construction, or at any time during the operating life o project.

None	iv. Describe special emergency services that might be required. Inticipated
	v. Proposed measures to reduce or control environmental health hazards, if any: any temporary soil stockpiles following the Stormwater Pollution and Protection Plan to contain any stormwantrol as required. State regulations regarding safety and the handling of hazardous material would be enforced during the constructions.
b.	Noise i. What types of noise exist in the area which may affect your project (for example: equipment, operation, other)?
Sourc	s of noise would be from traffic and the noise produced from equipment and trucks during the construction
Excav	 ii. What types and levels of noise would be created by or associated with the proje short-term or a long-term basis (for example: traffic, construction, operation, Indicate what hours noise would come from the site. attor operation and dump trucks. Work hours to be in line with permit requiremments
None	iii. Proposed measures to reduce or control noise impacts, if any: proposed. Shut down equipment when not in use.
	proposed. Shut down equipment when not in use.
Lanc	•
Lanc	and shoreline use What is the current use of the site and adjacent properties? Will the proposal affect curre uses on nearby or adjacent properties? If so, describe.
Lanc	and shoreline use What is the current use of the site and adjacent properties? Will the proposal affect curre uses on nearby or adjacent properties? If so, describe.
Land a. Gas s	and shoreline use What is the current use of the site and adjacent properties? Will the proposal affect curre uses on nearby or adjacent properties? If so, describe. ation and repair shop. Will not affect adjacent properties. Has the project site been used as working farmlands or working forest lands? If so, describe much agricultural or forest land of long-term commercial significance will be converted to uses as a result of the proposal, if any? If resource lands have not been designated, how
Land a. Gas s b.	and shoreline use What is the current use of the site and adjacent properties? Will the proposal affect curre uses on nearby or adjacent properties? If so, describe. ation and repair shop. Will not affect adjacent properties. Has the project site been used as working farmlands or working forest lands? Existin	g fuel canopy
e. Comm	What is the current zoning classification of the site? ercial City of Mercer Island.
f. High ir	What is the current comprehensive plan designation of the site?
g. N/A	If applicable, what is the current shoreline master program designation of the site?
h. No	Has any part of the site been classified as an "environmentally sensitive" area? If so, specify.
i. Six em	Approximately how many people would reside or work in the completed project?
Six em	ployees
Six em	ployees
j. None	Approximately how many people would the completed project displace?
j. None	Approximately how many people would the completed project displace? Proposed measures to avoid or reduce displacement impacts, if any: Proposed measures to ensure the proposal is compatible with existing and projected land upon the complete of the proposed measures.
j. None k. N/A	Approximately how many people would the completed project displace? Proposed measures to avoid or reduce displacement impacts, if any:
j. None k. N/A	Approximately how many people would the completed project displace? Proposed measures to avoid or reduce displacement impacts, if any: Proposed measures to ensure the proposal is compatible with existing and projected land u
j. None k. N/A	Approximately how many people would the completed project displace? Proposed measures to avoid or reduce displacement impacts, if any: Proposed measures to ensure the proposal is compatible with existing and projected land u
j. None k. N/A	Approximately how many people would the completed project displace? Proposed measures to avoid or reduce displacement impacts, if any: Proposed measures to ensure the proposal is compatible with existing and projected land u and plans, if any:
j. None k. N/A	Approximately how many people would the completed project displace? Proposed measures to avoid or reduce displacement impacts, if any: Proposed measures to ensure the proposal is compatible with existing and projected land u and plans, if any:

	b.	Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing.
	None.	
	C. None.	Proposed measures to reduce or control housing impacts, if any:
10.	Aest	hetics
	a. Fuel ca	What is the tallest height of any proposed structure(s), not including antennas? What is the principal exterior material(s) proposed? anopy with brand facia 18-feet in hieght
	b. None.	What views in the immediate vicinity would be altered or obstructed?
	c. N/A	Proposed measures to reduce or control aesthetics impacts, if any:
11.	Light	and glare
	a. None	What type of light or glare will the proposal produce? What time of day would it mainly occur?
	b. No	Could light or glare from the finished project be a safety hazard or interfere with views?
	c. None.	What existing off-site sources of light or glare may affect your proposal?
	d. N/A	Proposed measures to reduce or control light and glare impacts, if any:
42		
12.	a.	eation What designated and informal recreational opportunities are in the immediate vicinity? g, biking, and walking trails.

b. No.	Would the proposed project displace any existing recreational uses? If so, describe.
c.	Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any:
N/A	
Histo	oric and cultural preservation
a.	Are there any buildings, structures, or sites, located on or near the site that are over 45 years listed in or eligible for listing in national, state, or local preservation registers? If so, specific describe.
No.	
b.	Are there any landmarks, features, or other evidence of Indian or historic use or occupation? may include human burials or old cemeteries. Are there any material evidence, artifacts, or are of cultural importance on or near the site? Please list any professional studies conducted at
No.	site to identify such resources.
C.	Describe the methods used to assess the potential impacts to cultural and historic resources or near the project site. Examples include consultation with tribes and the department archeology and historic preservation, archaeological surveys, historic maps, GIS data, etc.
N/A	
d.	Proposed measures to avoid, minimize, or compensate for loss, changes to, and disturbance
N/A	resources. Please include plans for the above and any permits that may be required.
	sportation
Tran	
Tran a.	Identify public streets and highways serving the site or affected geographic area and description proposed access to the existing street system. Show on site plans, if any.

	Is the site or affected geographic area currently served by public transit? If so, generally described in the approximate distance to the nearest transit stop? Olic transportation will be affected.
C.	How many additional parking spaces would the completed project or nonproject proposal had been many would the project or proposal eliminate?
d.	Will the proposal require any new or improvements to existing roads, streets, pedestrian, bid or state transportation facilities, not including driveways? If so, generally describe (indiwhether public or private).
No.	
e.	Will the project or proposal use (or occur in the immediate vicinity of) water, rail, o transportation? If so, generally describe.
No.	
f.	How many vehicular trips per day would be generated by the completed project or propose known, indicate when peak volumes would occur and what percentage of the volume would trucks (such as commercial and non-passenger vehicles). What data or transportation movere used to make these estimates?
g. No.	Will the proposal interfere with, affect or be affected by the movement of agricultural and for products on roads or streets in the area? If so, generally describe.
——— h.	Proposed measures to reduce or control transportation impacts, if any:
N/A	
	ic services
a. No.	Would the project result in an increased need for public services (for example; fire protection, health care, schools, other)? If so, generally describe.
b.	Proposed measures to reduce or control direct impacts on public services, if any.

16.	Utilit	Utilities
