MICC 19.15.030 – Land Use Review Types.

There are four categories of land use review that occur under the provisions of the development code.

- A. *Type I.* Type I reviews are based on clear, objective and nondiscretionary standards or standards that require the application of professional expertise on technical issues.
- B. *Type II.* Type II reviews are based on clear, objective and nondiscretionary standards or standards that require the application of professional expertise on technical issues. The difference between Type I and Type II review is that public notification shall be issued for Type II decisions.
- C. *Type III.* Type III reviews require the exercise of discretion about nontechnical issues.
- D. *Type IV.* Type IV reviews require discretion and may be actions of broad public interest. Decisions on Type IV reviews are only taken after an open record hearing.
- E. The types of land use approvals are listed in Table A of this section. The required public process for each type of land use approval are listed in Table B of this section.
- F. *Consolidated permit processing.* An application for a development proposal that involves the approval of two or more Type II, III and IV reviews may be processed and decided together, including any administrative appeals, using the highest numbered land use decision type applicable to the project application. Consolidated land use reviews shall be subject to the longest review time period identified in MICC 19.15.040.
 - 1. The following permits and land use reviews are excluded from consolidated review and approval:
 - a. Building permits associated with the construction of one or more new single-family dwellings on lots resulting from the final plat approval of a short subdivision or long subdivision.
 - b. Building permits associated with shoreline conditional use permits and shoreline variance.
 - c. Project SEPA reviews.
 - 2. When a review is heard by multiple decision bodies, the higher decision body will make the final decision, and the lower decision body will review the project at a public meeting and issue a recommendation that will be reviewed by the higher decision body. The higher decision body will either adopt the recommendation as part of the permit conditions, will remand the recommendation back to the lower body for further consideration, will amend the recommendation, or will deny adoption of the recommendation and will adopt their own permit conditions. The hierarchy of decision bodies is as follows, from highest to lowest:
 - a. City council;
 - b. Hearing examiner;

- c. Design commission.

G. *Interior alterations exempt from site plan review.*

- 1. Applications for interior alterations are exempt from site plan review provided they meet the following criteria:
 - a. The proposed development does not result in additional sleeping quarters or bedrooms;
 - b. The proposed development would not result in nonconformity with federal emergency management agency substantial improvement thresholds; or
 - c. The proposed development would not increase the total square footage or valuation of the structure thereby requiring upgraded fire access or fire suppression systems.
- 2. Applications for interior alterations are subject to review for consistency with any otherwise applicable building, plumbing, mechanical, or electrical codes.
