Subject: I-90 Trail - please design it for safe bicycling

Commissioners,

As a user of the I-90 trail as a biker and a walker, I oppose the dangerous raised planter bed with a curb in the roundabout at the bottom of the hill near the tennis courts. Please consider that during the fall/winter months, many commuters are using the trail in the dark hours. As I understand it, the trail is a WSDOT shared use trail. Therefore, I respectfully request that you remove this planter bed/obstacle which may likely cause a biker to fall and be injured. Thank you for the opportunity to provide input on the 30% design.

Subject: 30% design recommendation to improve safety on the I-90 trail portion that runs from West Mercer across the lid and past the ball fields to North Mercer Way

To: Parks and Recreation Commission

I oppose one dangerous element in the design: a raised planter bed with a curb in the middle of a roundabout at the bottom of the hill passing the tennis courts. The raised bed is in a dark, unlit, shaded area with short sightlines which could easily cause a cyclist to fall.

Kind regards,

José Oncina
