I looked back through our emails...and see below. this happened after our submittal and then we swapped out the final plat and landscape plan to drop the building lot and add a common lot.

Alan,

apparently, Brody Square doesn't quite have the room for the proposed playground for Daphne Square. Just found out last night, so I emailed the landscape architect, surveyor, and engineer to make the revisions to our plat/plans. We are now dropped to 28 building lots and 1 extra common lot. It will probably take a week to get the revisions back to you. oh well, we tried to do the right thing.

thanks

Matt Schultz
