STAFF REPORT

COMMUNITY DEVELOPMENT DEPARTMENT

HEARING

February 1, 2024

DATE:

TO: Planning & Zoning Commission

FROM: Stacy Hersh, Associate Planner

208-884-5533

SUBJECT: Avani Neighborhood AZ, PP

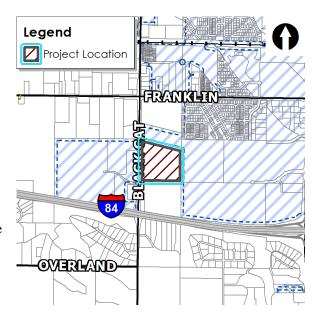

H-2023-0049

LOCATION: Southeast of Franklin Road and Black

Cat, North of I-84, in the SW 1/4 of the

NW 1/4 of Section 15, T.3N., R.1W.

(Parcel #S1215233650)

I. PROJECT DESCRIPTION

Annexation of 35.086 acres of land to the R-15 (Medium-high-density residential) zoning district; and Preliminary Plat consisting of 256 building lots and 25 common lots on 33.71-acres of land in the R-15 zoning district for Avani Neighborhood Subdivision.

NOTE: Staff is recommending denial of the project because the applicant's design (plat and elevations) is inconsistent with the design elements outlined in the TMISAP. The applicant has been made aware of Staff's concerns and has elected to forego some of Staff's recommended changes to gain a favorable recommendation. Below provides the basis for Staff's recommendation; however, the Commission and Council should rely on all relevant information when determining if this project is consistent with the Plan and open to allowing deviations from the design elements as desired by the Applicant.

II. SUMMARY OF REPORT

A. Project Summary

Description	Details			
Acreage	33.71acres (35.086 acres - annexation area)			
Future Land Use Designation	Medium-High Density Residential (MHDR) in the Ten Mile Interchange			
	Specific Area Plan (TMISAP)			
Existing Land Use	agricultural			
Proposed Land Use(s)	SFR detached and attached dwellings			
Current Zoning	Rural-Urban Transition (RUT) in Ada County			
Proposed Zoning	R-15			
Lots (# and type; bldg/common)	256 building/8 common lots			
Phasing plan (# of phases)	3 Phases			
Number of Residential Units (type of units)	256 residential lots (95 attached units, 161 detached units)			
Density (gross & net)	7.60 units/acre (gross)			
Open Space (acres, total [%] /	6.68 (or 19.8%) qualified			
buffer / qualified)				
Physical Features (waterways,	Large central park, community pool with changing rooms, fenced play structure, swing set, seating benches, climbing dome, climbing rocks, fenced dog park and (2) pickleball sports courts. The Rosenlof Drain bisects the northwest corner of the site.			
hazards, flood plain, hillside)				
Neighborhood meeting date	7/26/2023			
History (previous approvals)	None			
	None

Proposed Road Improvements	Capital Improvements Plan (CIP)/ Integrated Five Year Work Plan (IFYWP): Franklin Road is scheduled in the IFYWP to be widened to 5-lanes from McDermott Road to Black Cat Road with the design year in 2026 and the construction date has not been determined. The intersection of Franklin Road and McDermott Road is scheduled in the IFYWP to be reconstructed as a single-lane expandable roundabout. There is no design year or construction year, and this project requires coordination with the Nampa Highway District. DRAFT Avani Subdivision/ MPP23-0010/ H-2023-0049
	Black Cat Road is listed in the CIP to be widened to 5-lanes from Franklin Road to Overland Road between 2036 and 2040. Funding for ITD's portion is not included with this project.

Fire Service

Fire Service	
Distance to Fire Station	2.8 miles from Station #2
Fire Response Time	Falls just outside of the 5-minute response time goal
Resource Reliability	82% (above the targeted goal of 80%)
Accessibility	This project meets all required access, road widths, and turnarounds as presented in the preliminary plat. The shared drives shall have an address sign at each entrance, the roadways, common driveways, and alleys shall be maintained 365 days a year for fire, EMS, and police responses.
Additional Comments/Concerns	See Fire Staff Report in the link provided below under Section IX(C).
Police Service	No comments received
Distance to Fire Station	
Fire Response Time	
 Accessibility 	
West Ada School District	No Comments received
Distance (elem, ms, hs) Capacity of Schools # of Students Enrolled	
# of students estimated for this development	
Wastewater	
Wastewater Modeling	 • Must provide to and through to \$1215325450 • End of the line requires 0.6% slope • Flow is committed • Sewer/water easement varies depending on sewer depth. Sewer 0-20 ft deep require a 30 ft easement, 20-25 ft a 40 ft easement, and 25-30 ft a 45 ft easement. Adjust easements accordingly. • Sewer easement varies depending on sewer depth. Sewer 0-15 ft deep require a 20 ft easement, 16-20 ft a 30 ft easement, and 21-30 ft a 40 ft easement. Adjust easements accordingly. • Ensure no permanent structures (trees, bushes, buildings, carports, trash receptacle walls, fences, infiltration trenches, light poles, etc.) are built within the utility easement. • Ensure no sewer services pass through infiltration trenches.
 Project Consistent with WW Master Plan/Facility Plan 	
- I / / C	See Public Works Site Specific Conditions under Section IX(B)
• Impacts/Concerns	See Fubile Works Site Specific Conditions under Section 1A(B)

 Distance to Services 	Water available at site
Pressure Zone	2
 Estimated Project Water ERU's 	See Application
 Water Quality Concerns 	None
 Project Consistent with Water Master Plan 	Yes
• Impacts/Concerns	 See Public Works' Site-Specific Conditions under Section IX(B) If a well is located on the site it must be abandoned per regulatory requirements and proof of abandonment must be provided to the City. Each phase of the development will need to be modeled to verify minimum fire flow pressure is maintained. Development requires two connections for looping. There are two options Option 1: Provide a second connection in zone 2 from either the north or the east Option 2: A second connection to Black Cat Rd. However, this requires a connection from Franklin road through parcel \$1216120735 to parcel \$1216131200. Additionally, the main in Black Cat Rd along the western boundary mast be connected to the rest of the water system in two different places. In other words, the development cannot have two ties to Black Cat Rd if that run of main is a dead end. There are multiple spots where fittings are located within the gutter. Don't have fittings in the gutter.

III. APPLICANT INFORMATION

A. Applicant:

Laren Bailey, Conger Group – 4824 W. Fairview Avenue, Boise, ID 83706

B. Owner:

BLACKCAT1, LLC - P.O. Box 1968, Eagle ID 83616

C. Representative:

Laren Bailey, Conger Group – 4824 W. Fairview Avenue, Boise, ID 83706

IV. NOTICING

	Planning & Zoning Posting Date	City Council Posting Date
Newspaper notification published in newspaper	1/16/2024	
Radius notification mailed to property owners within 500 feet	1/12/2024	
Public hearing notice sign posted on site	1/18/2024	
Nextdoor posting	1/10/2024	

V. COMPREHENSIVE PLAN ANALYSIS

LAND USE: This property is designated Medium High-Density Residential (MHDR) on the Future Land Use Map (FLUM) and is located within the area known as the Ten Mile Specific Area Plan (TMISAP). MHDR areas are recommended to develop primarily with relatively dense multi-family housing types, such as row houses, townhouses, condominiums, and apartments, not all single-family attached and detached homes as proposed by the applicant. These areas should have a mix of housing types that achieve an overall average density target of 12 dwelling units per acre with densities ranging from 8-15 units per acre. MHDR areas typically are relatively compact areas within a larger neighborhood and generally should be located around and near more intensely developed areas, such as Mixed Use Commercial or Employment areas, in order to provide convenient access to these commercial activity and employment centers for the greatest number of residents.

As noted above, the proposed development incorporates a mix of single-family attached (95) and single-family detached (161) homes, resulting in an overall gross density of 7.59 units per acre inconsistent with the target density desired in the MHDR FLUM designation in the TMISAP. Townhomes should be included in this development to be more consistent with the plan; however, the property to the east has approval to construct a 552-unit multi-family development to offset the need for additional multi-family in the area. Mixed—Employment areas are also entitled or in the development process to the west, south, and southeast so it is conceivable that this development may provide additional housing options for these employment areas.

TRANSPORTATION: ACHD's Master Street Map (MSM) depicts a new town center collector street across the southern portion of this property from the west to the east boundary eventually connecting to S. Ten Mile Road. The Transportation System Map in the TMISAP lists the functional classification for this street as a collector street and the Street Section Map lists the design classification as a major collector street, which is intended to be constructed consistent with Street Section C as follows:

This street is planned to eventually provide a connection from S. Black Cat Road to S. Ten Mile Road. The applicant is currently collaborating with the property owners directly to the south and east to complete the Collector Street (Vanguard Way) connection to Black Cat. It is the City's desire to have this street dedicated and constructed before residents occupy the homes in this development.

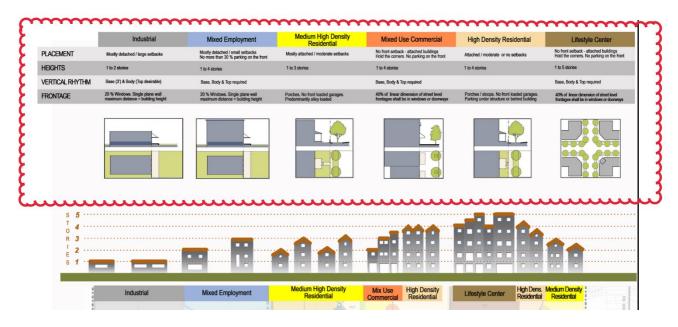

Local streets, alleys, and common drives are proposed internally for access to the proposed residential units. Staff believes the plat should incorporate more ally-loaded lots however, the Applicant believes there isn't a market for this type of housing and has elected to limit the number of alley-loaded homes to ten (10) which is inconsistent with the Plan.

BACKGROUND: Ten Mile Interchange Area was intended to look, feel, and function differently than a typical residential subdivision. It operates as a form-based specific area plan, where the design of the built environment is the primary review element and intended to work in conjunction with the land use and zoning designations. These design elements should not be treated as a checklist; but used to implement the overall vision and support traditional neighborhood design desired by the Plan.

DESIGN ELEMENT: The design element is intended to serve as the basic framework for a project within the Ten Mile Interchange Area and the basis for the development of future design guidelines. They are considered the most important elements to "get right," there is not flexibility allowed in the modification of design elements. Future development should be consistent with the design elements in the TMISAP for the MHDR FLUM designation as determined by the Application of the Design Elements table (refer to the table below). Staff's analysis for how the Applicant's design adheres to the applicable design elements are italized below.

NOTE: Some of these design elements are not required by the UDC as envisioned by the Plan. Therefore, the applicant requests the Commission and Council allow some deviations to these design elements.

3-33. Street-oriented Design: Useable porches should be a dominant element of residential buildings and should be located along at least 30% of the front façade of the buildings – a higher percentage is recommended as is the location of porches on one or more side facades. When possible, garages should be

loaded from a rear alleyway. Where garages must be accessed from the front, the garages must be located no less than 20' behind the primary façade. Front-loaded 2-car garages that are visible from the primary street must be designed with two (2) separate garage doors.

Out of the 256 single-family units, only 10 are alley-loaded; the others are all front-loaded with living area either at the same plane or behind the garages away from the street. A few of the units have usable porches that might meet the guidelines. No porches are proposed on the side facades. All units have single 2-car garage doors, not separate doors.

3-34. Buildings to Scale: Everything seen and experienced from the sidewalk – building fronts, lighting, open space – should be designed for human interaction at a pedestrian's perspective. Key elements to consider are the continuity of the building sizes, how the street-level and upper-level architectural detailing is treated, elements that anchor and emphasize pedestrian scale, roof forms, rhythm of windows and doors, and general relationship of buildings to public spaces such as streets, plazas and other open space. Human-scale design is critical to the success of built places for pedestrians. Building entrances should be placed close to the street; ground floor windows, articulated facades, appropriately scaled lighting, awnings and other weather protection should be provided.

The proposed elevations do not meet the design criteria that encourage building entrances to be situated close to the street, primarily due to their garage-dominated nature. Elevations for the alley-loaded units were not submitted with the application, making it difficult for Staff to determine if they comply with these guidelines. Lighting at a pedestrian scale should be provided on the buildings facing the street and internal walkways. A different product type should be provided for the detached and attached units with garages behind the units, and building entrances facing the street with front/side porches.

3-36. Neighborhood Design: All residential neighborhoods in the Ten Mile interchange area should be developed in consideration of traditional neighborhood design principles and concepts, which pertain to mixed housing stock, architecture and design, streetscapes and streets. Front porches and garages accessed from an alley are usually the standard in residential areas; parking for homes is primarily located behind buildings. Streetscape design relates to the street itself and consists of landscaped parkways with trees between curbs and sidewalks, adjacent sidewalks and front yard spaces and provides public space for street trees, street furniture and view corridors. Other aspects of neighborhood design that contribute to a traditional streetscape are connected network of streets, alleys and sidewalks. Roadways and pedestrian ways are interconnected so that access for pedestrians, cyclists and automobile drivers is direct and convenient and allows traffic to be dispersed through a variety of streets and ways. Narrower streets designed with TND characteristics result in slower moving traffic and provide a safer, more pleasant pedestrian environment and encourages interaction among residents.

As previously noted, usable porches that meet the minimum guidelines are not provided for the single-family attached and detached units as desired. Alley-accessed garages and parking are only provided for the 10 detached units; the other 246 single-family units are all accessed from the street with parking in front of the garages facing the street, which is not desired.

Shorter block lengths and narrower streets help build a greater sense of community. As proposed, these lots are narrow and garage dominated which creates more driveways and less tree-lined streets along the primary streets which is contradictory to TND principles. More alley-loaded homes would enchance the streetscape for this development and ground the front porches to the primary street per the Plan.

3-37. Building Form & Character: Building Facades – Buildings should be designed so that their primary facades relate to active public spaces and pedestrian areas. The primary façade of a structure is that frontage of the building that has been designed and detailed so as to represent the building's most important elevations. The primary façade should always include an entry into the building. Entries should be located so as to provide direct access from adjacent public spaces, primary streets and activity areas. Access from walkways should be uninterrupted by vehicular traffic. Buildings should be located so as to help frame

adjacent public spaces and to provide an architectural backdrop for associated passive and active activities. The space between a building façade and the adjacent walkway should be appropriately landscaped with a combination of lawns, groundcover, shrubs and trees.

Access from walkways to the main living areas is only uninterrupted by vehicular traffic for 10 alley-loaded units, as these units have garages accessed from the alleys. The other single-family attached and detached structures are not designed to have the primary façade relate to active pedestrian areas, public spaces, or primary streets due to the orientation of the garages and building entries. Building entries are not the focal point of the homes and the front-loaded garages limit direct pedestrian access from the street because most of the entries are located behind the garages. As noted above, the 8-foot parkways are also diminished due to this design.

Building Heights: Low-rise buildings of 2-4 stories over much of the area is recommended.

A mix of one-story single-family and two-story single-family attached and detached structures are proposed in general conformance to this guideline. This applicant's preference is to have single-story homes along collector and arterial streets to enhance the streetscape.

• **Pitched Roofs:** A mix of flat and pitched roofs are anticipated in the Ten Mile area based on a wide variety of individual buildings. Pitched roofs should be, where possible, symmetrical hips or gables, with a pitch between 4:12 and 12:12 with an overhang of at least 12 inches and a maximum of 2.5'. Roof brackets and rafter tail treatments are encouraged.

All of the roof pitches proposed fall within the desired pitch range. Corbels are depicted some of the concept elevations; rafter tail treatments are encouraged as well as other design elements as noted in the ASM. Staff cannot verify if there is at least 12 inches of overhang for all of the one-story and two-story homes proposed.

3-47. Public Art: Public art should be incorporated into the design of streetscapes, public buildings, parks, transit, infrastructure, and other public projects in the Ten Mile area. Public art should be meaningful and encourage the free flow of ideas and cultural ideologies. Public art should be integrated into either the architectural design or the design of plazas and public spaces associated with a building and should be easily visible to the public (e.g. visible from the street or publicly accessible open spaces rather than interior courtyards).

Public art is not proposed but could be provided in accord with this guideline. If the applicant desires to include public art as part of the development it would qualify as another amenity (1 point).

Goals, Objectives, & Action Items: Staff finds the following Comprehensive Plan policies to be applicable to this application and apply to the proposed use of this property; however, the TMISAP takes precedence over the Comprehensive plan (staff analysis in *italics*):

• "With new subdivision plat, require the design and construction of pathways connections, easy pedestrian and bicycle access to parks, safe routes to schools, and incorporation of usable open space with quality amenities." (2.02.01A)

The Applicant is proposing to construct 10-foot wide multi-use pathways along S. Black Cat Road and Vanguard Way (new collector) in accordance with the Meridian Pathways Master Plan Map. Additionally, a 5-foot wide micro path is proposed on the east side of the site, extending in a north-south direction. The following amenities are proposed: community pool and changing rooms, fenced play structure, swing set, seating benches, climbing dome, climbing rocks, fenced dog park, and two (2) pickleball courts, exceeding the requirements outlined in UDC 11-3G-4.

• "Require all new residential neighborhoods to provide complete streets, consistent with the Transportation and Land Use Integration Plan." (2.02.01C)

The plat illustrates that all internal local streets within this development are depicted as 27-foot wide street sections with curbs and gutters, allowing parking on only one side. "No Parking" signs shall be installed on that designated side of the street. The smaller street sections are encouraged in the TMISAP to promote pedestrian movement and access by enhancing connectivity and promoting walking.

• "Require pedestrian access in all new development to link subdivisions together and promote neighborhood connectivity." (2.02.01D)

The proposed 10-foot wide pathways and 5-foot wide micro path provide connectivity to the Mixed Employment developments proposed to the south, the proposed multi-family development (Vanguard Village) to the east, and the future medium-high density development to the north.

• "Continue to develop and implement the desired vision in special areas, areas with specific plans, and along key transportation corridors." (3.03.01A)

The TMISAP is a form-based specific area plan where the design of the built environment is the primary review element. The City's vision for this area is for all residential to have a Traditional Neighborhood Design. Front porches and alley-loaded garages are the standard and help to create a pedestrian-friendly environment. Streetscapes should relate to the street itself and landscaping with trees between curbs and sidewalks, the adjacent, front yard spaces, and the building frontages. Staff finds that the proposed plat, landscape, and elevations do not align with the City's vision for this area.

- "Annex lands into the corporate boundaries of the City only when the annexation proposal conforms to the City's vision and the necessary extension of public services and infrastructure is provided." (3.03.03)
 - The Applicant's design does not align with the Plan; therefore, staff finds it is not in the City's best interest to annex this property.
- "Permit new development only where it can be adequately served by critical public facilities and urban services at the time of final approval, and in accord with any adopted levels of service for public facilities and services." (3.03.03F)

City water and sewer service is available and can be extended by the developer with development in accord with UDC 11-3A-21.

- "Ensure that new development and subdivisions connect to the pathway system." (4.04.01A)
 - The proposed subdivision proposes a 10-foot wide pathway along S. Black Cat Road and Vantage Point Way (new collector) in accordance with the Meridian Pathways Master Plan Map, thereby enhancing connectivity to future developments.
- "Assess and compare response times to adopted standards for identification of additional needed resources." (4.11.01B)

This project currently falls in an area where emergency personnel don't have response times that meet NFPA 1710 standards or the current City of Meridian adopted standards. The first due station is Fire Station 2. This fire station is approximately 2.8 miles from the project.

• "Foster a walkable and bikeable community through good site and street design." (5.01.01A)

The pathways and sidewalks within the development contribute to creating a walkable community. However, the proposed narrower street sections should coincide with shorter block lengths or traffic calming to provide a more compact, diverse, and walkable neighborhood as envisioned by the plan.

ACHD is also requiring shorter block lengths or passive traffic calming.

• "Ensure development is connected to City of Meridian water and sanitary sewer systems and the extension to and through said developments are constructed in conformance with the City of Meridian Water and Sewer System Master Plans in effect at the time of development." (3.03.03A)

The proposed development will connect to City water and sewer systems with development of the subdivision; services are required to be provided to and through this development in accordance with current City plans.

• "Encourage the integration of public art as an integrated component with new development". (5.03.01B)

Public art is not proposed with this development as emphasized by the TMISAP. Public Art should be included as a fundamental element in new development projects within the TMISAP. This policy suggests a commitment to fostering a visually enriched and culturally vibrant environment by actively encouraging the inclusion of artistic elements as an integral part of the overall development strategy. Public art could be displayed either at the entrance to the subdivision and/or within the large central park proposed in the development.

VI. STAFF ANALYSIS

A. ANNEXATION (AZ)

The Applicant proposes to annex 35.214 acres of land with an R-15 (Medium-High Density Residential) zoning district which is listed in the Zoning District Compatibility Matrix in the TMISAP as one of the best choices for zoning in the MHDR designation.

A preliminary plat and conceptual building elevations were submitted, included in Section VIII, showing how the property is proposed to be subdivided into 256 building lots and 25 common lots for the development of 10 single-family detached alley-loaded dwellings, 95 single-family attached dwellings & 151 single-family detached dwellings.

The proposed residential use and mix of housing types may be consistent with the MHDR FLUM designation; however, the proposed density of 7.59 is below the target density of 12 dwelling units per acre. The proposed architectural design does not comply with the TND guidelines in the TMISAP, as discussed above. Development in this area should conform to these guidelines in order to be deemed consistent with the Plan and determine if it is in the City's best interest to annex this property.

This property, is surrounded by an existing light industrial development to the west (Black Cat Industrial future residential uses to the north, future multi-family development to the east (Vanguard Village), a future R-15 development to the north (extension of Baraya), and mixed employment (M-E) proposed to the south.

A legal description and exhibit map for the boundary of the property proposed to be annexed is included in Section VIII.A. This property is within the City's Area of City Impact boundary and within the area governed by the Ten Mile Interchange Specific Area Plan (TMISAP), as discussed above in Section V.

The City may require a development agreement (DA) in conjunction with an annexation pursuant to Idaho Code section 67-6511A. A DA is not necessary based on staff's recommendation of denial.

B. PRELIMINARY PLAT (PP):

A preliminary plat is proposed consisting of 256 [95 single-family attached, 10 alley-loaded, and 151 single-family detached units] building lots and 25 landscape, six (6) common driveways, two (2) alleys, and one (1) non-buildable lot on 33.707-acres of land in the R-15 district. Proposed lots range in size

from 2,436 to 5,357 square feet (s.f.) with an average lot size of 3,584 (sf.) The subdivision is proposed to develop in three (3) phases as shown on the preliminary plat in Section VIII.C.

Single-family attached and detached dwellings are listed as a principal permitted use in the R-15 zoning district per UDC <u>Table 11-2D-2</u>. The proposed plat appears to comply with the R-15 zoning standards.

Existing Structures/Site Improvements: There are no existing structures on the property that are proposed to be removed upon development.

Dimensional Standards (UDC <u>Table 11-2D-6</u>): The proposed plat and subsequent development is required to comply with the dimensional standards listed in UDC Table <u>11-2D-6</u> for the R-15 zoning district. There is a 2,000 minimum lot size in the R-15 district; each building site is required to be of sufficient size to meet the minimum setbacks for the district.

Access: Access is proposed via the extension of Vantage Point Way, a new collector street, along the southern boundary of the subdivision. Vantage Point Way will extend to the west boundary across Black Cat Road to be extended with the Black Cat Industrial Development (H-2021-0064).

Vantage Point Way should be constructed in accordance with Street Section C (major collector street) in the TMISAP, which requires (2) 11-foot travel lanes, 6-foot bike lanes, 8-foot parkways with streetlights at a pedestrian scale, and minimum 6-foot wide detached sidewalks (see pg. 3-20, 3-22, 3-23). The Applicant proposes a modification of the street section to include 10-foot wide detached sidewalks/pathways in lieu of on-street bike lanes, which is required by ACHD and as set forth in the Meridian Master Pathways Plan.

All streets should be constructed as complete streets as defined in the TMISAP (see pg. 3-19 & 3-20). Prior to submitting the final plat, the Applicant shall coordinate with the property owner to the south and east to construct Vantage Point Way and deed the right-of-way to ACHD. The Applicant should ensure that the intersection of Vantage Point Way and S. Black Road aligns with the entrance of the Black Cat Industrial projects on the west side of S. Black Cat Road.

The Applicant is proposing one (1) curb cut-off of Vantage Point Way, a planned collector street in the TMISAP. In accordance with UDC 11-3A-3 (Access to streets), multiple accesses off an arterial and/or collector roadway shall be restricted. The Applicant has proposed an emergency access only off of Black Cat Road and has included a stub street to the north (Street H) for potential future access. Staff recommends that the Applicant collaborates with the property owner to the east to consider incorporating a potential stub street on the east side of this site for connectivity to the future Medium-High Density Residential Development, subject to approval by ACHD.

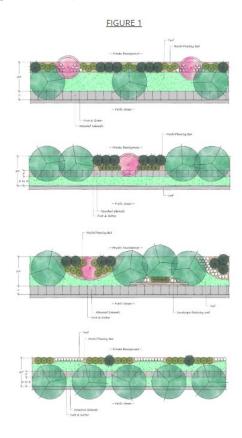

Common Driveway (UDC 11-6C-3D): Six (6) common driveways are proposed within the development of the site on Lot 42, Block 1, Lot 16, Block 1, Lot 41, Block 2, Lot 33, Block 2, Lot 16, Block, 2, and Lot 23, Block 5. Common driveways are allowed to serve a maximum of four (4) dwelling units; in no case shall more than three (3) dwelling units be located on one (1) side of the driveway. A total of four (4) dwelling units are proposed on the south side of driveway for Lot 23, Block 5; the final plat and common driveway exhibit shall be revised to depict a maximum of three (3) units on one (1) side of the driveway as required; or, alternative compliance may be requested as set forth in UDC 11-5B-5.

A perpetual ingress/egress easement is required to be filed with the Ada County Recorder for the common driveway, which shall include a requirement for maintenance of a paved surface capable of supporting fire vehicles and equipment. This may be accomplished through the depiction of the easement on the face of the final plat and an accompanying note. If a separate easement is recorded, a copy should be submitted to the Planning Division with the final plat for City Engineer signature.

Alleys (UDC <u>11-6C-3B.5</u>): Two (2) 40-foot wide alleys are proposed for access to the single-family detached dwelling units on lots in Block 3 and Block 4. The Alley should be constructed in accord with the standards listed in UDC <u>11-6C-3B.5</u>. A detail of the alley should be submitted with the final plat that demonstrates compliance with these standards.

Parking: All single-family attached and detached dwelling units are proposed to have a 2-car garage with a 2-space parking pad consistent with UDC <u>Table 11-3C-6</u> for 1- to 4-bedroom units; if any units contain more than 4 bedrooms, an additional two (2) spaces are required with at least one (1) of those being an enclosed space. An additional 150 on-street parking spaces (0.5+ per home) are available for residents and guests as shown on the parking exhibit in Section VIII.I. These spaces are located adjacent to common areas and in front of the detached dwelling units and attached dwelling units. Staff finds that there is not adequate room in front of the attached units for on-street parking with the width of the lots vs. the driveways. With the narrow 27-foot wide streets proposed internally, which are desired with the *TMISAP*, parking is only allowed on one side of the street.

Landscaping (UDC 11-3B): A 25-foot wide street buffer is required is required along all arterial streets (i.e. S. Black Cat Road) in residential districts. A 20-foot wide street buffer is required along all collector streets (i.e. Vantage Point Way) a collector street, per UDC <u>Table 11-2D-7</u>, landscaped per the *updated* standards listed in UDC <u>11-3B-7C</u>. The proposed buffer along the southern half of Black Cat Road appears to be 20-feet in width and should be 25-feet in width. The 20-foot wide buffer along the new collector street (Vanguard Way) appears to meet the requirements of the UDC code; however, there is a lack of a combination of planters (shrubs and rock mulch) within both of the buffers (refer to the figures below).

An 8-foot wide parkway with Class II trees is required along all local streets per UDC <u>Table 11-2D-6</u>, landscaped per the standards listed in UDC <u>11-3B-7C</u>.

All common open space areas are required to be landscaped with one deciduous shade tree for every 5,000 square feet of area and include a variety of trees, shrubs, lawn or other vegetative groundcover per UDC <u>11-3G-5B.3</u>. The landscape plan appears to comply with this requirement.

There are several existing trees on the south side of this this site that will be removed with development. An existing tree inventory and mitigation plan is not included in Section VIII.H. **Mitigation is required to be provided per the standards listed in UDC** <u>11-3B-10C.5</u>; calculations demonstrating compliance should be included on the landscape plan submitted with the final plat application.

Landscaping is required along all pathways per the standards listed in UDC 11-3B-12C.

Common Open Space (UDC *11-3G-3*): A minimum of 15% qualified open space is required to be provided within the single-family development per <u>Table 11-3G-3</u> for the R-15 zoning district. Based on 33.707-acres of land, a minimum of 5.06 acres is required to be provided that complies with the standards listed in UDC *11-3G-3B*.

The exhibit included in Section VIII.F depicts 19.8% (or 6.68 acres) of common open space for the single-family (detached and attached dwelling units) development consisting of one (1) large common area over 5,000 square feet (s.f.) at 60,785 (s.f.), a micro-path that runs along the entire east side of the site; 8-foot wide landscaped parkways along the residential lots; and 10-foot wide pathways running along S. Black Cat Road and the new collector (vantage Point Way). The collector street buffers do not count toward qualified open space unless they meet the enhanced buffer requirements noted in UDC 11-3G-3B.3, which is interpreted to mean buffer landscape materials consistent with entryway corridors listed in UDC 11-3B-7C.3f. Additionally, per UDC 11-3G-3B.3, one hundred (100) percent of the landscape buffer along collector streets and fifty (50) percent of the landscape buffer along arterial streets that meet the enhanced buffer requirements that follow may count toward the required common open space.

In order to qualify, common areas should be landscaped per the updated standards listed in UDC <u>11-3G-4B.3</u>; parkways and street buffers should be landscaped per the standards listed in UDC <u>11-3A-17E</u> and <u>11-3B-7C</u> [collector buffers must meet the enhanced buffer requirements (i.e. entryway corridor standards) in order to qualify]; stormwater swales that are incorporated into required landscaped areas should comply with the standards listed in UDC <u>11-3B-11C</u>; and linear open space should be landscaped per the requirements in UDC 11-3B.

Site Amenities (UDC 11-3G-4): A minimum of seven (7) points of site amenities are required based on the area of the single-family residential development. Qualified amenities should include features listed in UDC <u>Table 11-3G-4</u>. A 5,000+ s.f. children's playground with a play structure, swings, climbing rocks, a climbing dome, seating benches, within a safe fenced area, two pickle ball courts, and fenced dog park (9 points) is proposed which meets the minimum standard. The provision of public art, as recommended, will also qualify as an amenity (1 point). The 10-foot wide regional pathways along Black Cat Road and Vanguard Way consist of approximately 2,500 linear feet. Additionally, the 5-foot micro-pathway running north and south on the east side of the property spans approximately 1,000 linear feet. Combined, the proposed pathways total (4 points). Required sidewalks adjacent to public right-of-way do not qualify. Overall, the proposed amenities exceed the minimum standards.

Pathways: The Pathways Master Plan depicts multi-use pathways on this site along S. Black Cat Road and Vantage Point Way. The pathways shall be constructed in accordance with UDC 33-3A-8 and 11-3B-12. A 14-foot wide public use easement for all multi-use pathways shall be submitted to the Planning Division prior to submittal for City Engineer's signature on the final plat(s).

Sidewalks (11-3A-17): A 5-foot wide detached sidewalks are required along local streets within the development along with 8-foot parkways consistent with ACHD and the TMISAP. **The plans appear**

to comply with this requirement. Additionally, the common driveway located at the southwest corner of the development should incorporate a sidewalk adjacent to the 5-foot landscape buffer connecting to the 10-foot wide pathway along S. Black Cat Road to enhance walkability within the neighborhood.

Fencing (11-3A-7): Fencing should comply with the standards listed in UDC 11-3A-7. Six-foot tall solid vinyl fencing is proposed around the west, north, east, and south perimeter boundaries of the subdivision and on shared lot lines between building and common lots that are visible from the public street, as shown on the landscape plan. A 5' tall open vision iron fence is proposed around the children's playground area, pool, and dog park. A black chain link fence is proposed around the pickleball courts as shown on the picture in the narrative. All proposed fencing on the landscape plan appears to comply with the UDC.

Lighting (UDC <u>11-3A-11</u>): All proposed lighting shall meet the standards set forth in this title.

Waterways: The Marvin Lateral courses along the north and east boundaries of this site. Nampa Meridian Irrigations District's easement for the Marvin Lateral at this location is a minimum of thirty-five feet (35') total, ten feet (10') left and twenty-five feet (25') right facing downs stream. The Applicant is working with the irrigation district to obtain a license agreement. Per UDC 11-3A-6, the irrigation lateral intersecting, crossing or lying within the area being developed, shall be piped, or otherwise covered.

Utilities (*UDC 11-3A-21*): Connection to City water and sewer services is required in accord with UDC 11-3A-21. Street lighting is required to be installed in accord with the City's adopted standards, specifications and ordinances.

Pressurized Irrigation System (UDC *11-3A-15*): Underground pressurized irrigation water is required to be provided to each lot within the subdivision as set forth in UDC 11-3A-15.

Storm Drainage (UDC *11-3A-18*): An adequate storm drainage system is required in all developments in accord with the City's adopted standards, specifications and ordinances. Design and construction shall follow best management practice as adopted by the City as set forth in UDC 11-3A-18. A *geotechnical report* was submitted with this subdivision.

Building Elevations: Conceptual building elevations were submitted for the proposed structures within the development as shown in Section VIII.J. Six (6) elevations were submitted for the 1-story and 2-story attached and detached dwelling units. Building materials consist of mix of board & batten siding, horizontal lap siding with fiber cement panel accents, limited shake, and some stone. An elevation was not submitted for the pool changing rooms/bathrooms.

The proposed elevations are *not* approved and should be revised to incorporate traditional neighborhood design elements as set forth in the TMISAP, as noted above in Section V, and in the Architectural Standards Manual (ASM).

Certificate of Zoning Compliance Review: A CZC application(s) is required to be submitted for the for the pool changing rooms/bathrooms building within the development.

Design Review: A design review application(s) is required to be submitted for all single-family attached structures within the development. Final design of all structures should comply with the standards for single-family residential design listed in the Architectural Standards Manual (ASM) and the traditional neighborhood design guidelines in the Ten Mile Interchange Specific Area Plan (TMISAP) for the MHDR FLUM designation (see the Application of Design Elements table on pg. 3-49).

VII. DECISION

A. Staff:

Staff recommends denial of the proposed annexation and preliminary plat as the proposed project does not align the purpose and intent of the TMISAP, as outlined in the analysis in Section V in accordance with the Findings in Section X.

VIII. EXHIBITS

A. Annexation Legal Description and Exhibit Map

Sawtooth Land Surveying, LLC

P: (208) 398-8104 F: (208) 398-8105 2030 S. Washington Ave., Emmett, ID 83617

Avani Annexation Description

BASIS OF BEARING for this description is N. 0°43′00″ E., between a brass cap marking the 1/4 corner common to Sections 15 and 16 and an aluminum cap marking the northwest corner of Section 15, T. 3 N., R. 1 W., B.M., Ada County, Idaho.

A parcel of land located in the SW1/4 of the NW1/4 of Section 15, T. 3 N., R. 1 W., B.M., Ada County, Idaho, more particularly described as follows:

BEGINNING at an aluminum cap marking the 1/4 corner common to Sections 15 and 16;

Thence N. 0°43′00″ E., coincident with the west line of said SW1/4 of the NW1/4 and the centerline of S. BlackCat Road, 1319.36 feet;

Thence leaving said west line and said centerline, S. 75°42′00″ E., 1359.87 feet to the east line of said SW1/4 of the NW1/4;

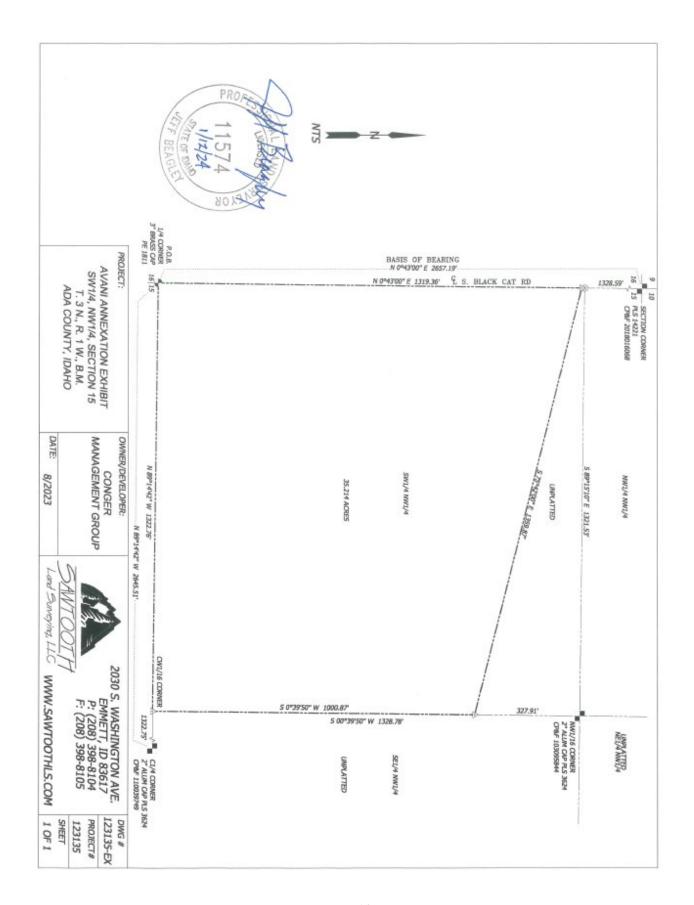

Thence S. 0°39′50″ W., coincident with said east line, 1000.87 feet to the SE corner of said SW1/4 of the NW1/4 (CW1/16 corner);

Thence N. 89°14'42" W., coincident with said south line, 1322.76 feet to the POINT OF BEGINNING.

The above described parcel contains 35.214 acres more or less.

A	11 3G 3A 2B	Open grassy area of at least 5,000' in area.
В	11 3G 3B 1E	Linear open space area that is at least twenty feet (20') and up to fifty feet (50'), has an access at each end, and is improved and landscaped as set forth in subsection E of this section.
с	11 3G 3B 3	Full Area of Buffer: The full area of the landscape buffer along collector streets may count toward the required common open space.
D	11 3G 3B 3	Percentage of Buffer: Fifty percent (50%) of the landscape buffer along arterial streets may count toward the required common open space.
E	11 3G 3B 4	Parkways Along Collector and Local Residential Streets: Parkways along local residential streets that meet all the following standards may count toward the common open space requirement:

G. Site Amenities

Proposed Amenities:

- Large Central Park The one and a half-acre park will contain the following recreation facilities:
 Community Pool and Changing Rooms

 - Fenced Play Structure
 - Swing Set
 - **Seating Benches**
- **Climbing Dome** Climbing Rocks Attractive Landscaping Fenced Dog Park
 2 Pickle Ball Sports Courts
- Pathways The Avani Neighborhood will include the following pedestrian pathways:

 5' Wide Pedestrian Pathway on the east side of the project running North and South for approximately 1,000 L.F.

 10' (Paris of Control Con
 - 10 'Regional Pathways will be constructed along Black Cat Road and Vantage Point Way for approximately 2,500 L.F.

Pedestrian pathways within the Avani Place Neighborhood will total over one half mile in length.

X. FINDINGS

A. Annexation and/or Rezone (UDC 11-5B-3E)

Required Findings: Upon recommendation from the commission, the council shall make a full investigation and shall, at the public hearing, review the application. In order to grant an annexation and/or rezone, the council shall make the following findings:

- 1. The map amendment complies with the applicable provisions of the comprehensive plan; Staff finds the Applicant's request to annex the subject property with R-15 zoning and develop a mix of single-family attached and detached dwellings falls short of the target density of 12 dwelling units to the acre and lacks specific design elements making it inconsistent with the comprehensive plan.
- 2. The map amendment complies with the regulations outlined for the proposed district, specifically the purpose statement;
 - Staff finds the map amendment complies with the R-15 district regulations however, the proposed development fails to comply with the purpose statement and found to be inconsistent with the design elements for this area, nor does it achieve a target density of 12 dwelling units to the acre.
- 3. The map amendment shall not be materially detrimental to the public health, safety, and welfare; Staff finds the proposed map amendment will not be detrimental to the public health, safety and welfare.
- 4. The map amendment shall not result in an adverse impact upon the delivery of services by any political subdivision providing public services within the city including, but not limited to, school districts; and
 - Staff finds City services are available to be provided to this development.
- 5. The annexation (as applicable) is in the best interest of city.
 - Staff finds annexation is not in the best interest of the City because the proposed development lacks specific design elements contained in the comprehensive plan.

B. Preliminary Plat (UDC 11-6B-6)

In consideration of a preliminary plat, combined preliminary and final plat, or short plat, the decision-making body shall make the following findings: (Ord. 05-1170, 8-30-2005, eff. 9-15-2005)

- 1. The plat is in conformance with the comprehensive plan and is consistent with this unified development code; (Ord. 08-1372, 7-8-2008, eff. 7-8-2008)
 - Staff finds the proposed plat is generally in conformance with the UDC, however the plat lacks specific design elements as noted in Section V. which makes the development inconsistent with the comprehensive plan.
- 2. Public services are available or can be made available and are adequate to accommodate the proposed development;
 - Staff finds public services can be made available to the subject property and will be adequate to accommodate the proposed development.

- 3. The plat is in conformance with scheduled public improvements in accord with the city's capital improvement program;
 - Staff finds the plat is in conformance with scheduled public improvements for this area in accord with the City's CIP.
- 4. There is public financial capability of supporting services for the proposed development; Staff finds there is public financial capability of supporting services for the proposed development.
- 5. The development will not be detrimental to the public health, safety or general welfare; and Staff finds the proposed map amendment would not be detrimental to the public health, safety and welfare.
- 6. The development preserves significant natural, scenic or historic features. (Ord. 05-1170, 8-30-2005, eff. 9-15-2005)
 - Staff is unaware of any significant natural, scenic or historic features that need to be preserved with this development.
