RE: Trojan UV3000 Plus System Replacement Parts

Dear Mr. Henson:

In the Engineered Submittal Package for the Trojan UV3000Plus System, Trojan provided an equipment performance guarantee stating that those systems will meet the required level of disinfection provided that the systems are operated and maintained in accordance with recommendations made by Trojan Technologies.

For this equipment guarantee to be maintained, it is imperative that the appropriate components and replacement parts be used in those systems. There are key replacement parts and system components that directly influence the performance and reliability of each system. Among these critical replacement parts are the UV lamps, electronic ballasts, wiper components and printed circuitry. Without using these critical replacement parts that are approved and validated by Trojan Technologies, we cannot guarantee that those systems will provide the required germicidal output.

In order to keep the equipment performance guarantee intact, it is recommended that specialized system components be purchased directly from Trojan Technologies. Trojan purchases only validated system components (lamps, ballasts etc.) from our suppliers and only those components meeting our performance standards are passed on to the customer.

If you have any questions regarding this matter or require any additional information, please do not hesitate to contact me.

Best regards,

Heather Conine
