

COMMUNITY DEVELOPMENT DEPARTMENT REPORT

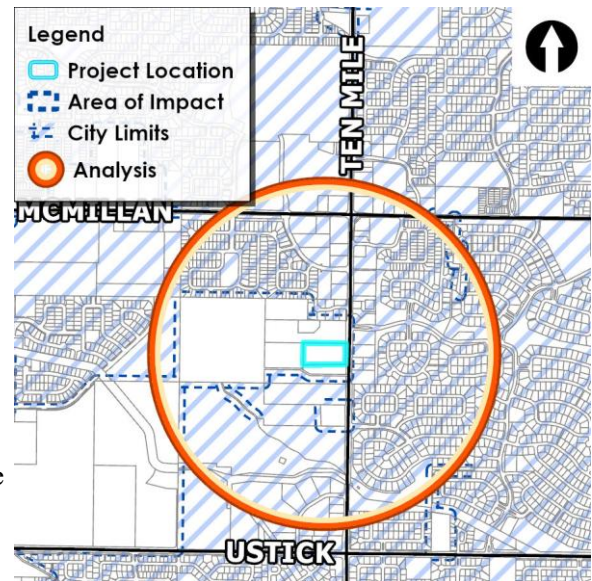

HEARING DATE: 9/9/2025
TO: Mayor & City Council
FROM: Nick Napoli, Associate Planner
208-884-5533
nnapoli@meridiancity.org

APPLICANT: Jeff Hatch

SUBJECT: H-2025-0027
Ten Mile Flex

LOCATION: Located at 4255 N. Ten Mile Road in the southeast 1/4 of the northeast 1/4 of Section 34, T.4N., R.1W.

I. PROJECT OVERVIEW

A. Summary

Annexation of 5.55 acres of land for the construction of approximately 15,900 square feet of multi-tenant industrial and 70,250 square feet of self-service storage (storage condos) in the I-L zoning district.

B. Issues/Waivers

The applicant requests a City Council waiver to reduce the 25-foot landscape buffers to 10 feet to the south and west and 15 feet to the north. The property is surrounded by existing residential in Ada County.

C. Recommendation

Staff: Approval

Commission: Approval as presented in the staff report.

D. Decision

Council: Pending

III. STAFF ANALYSIS

Comprehensive Plan and Unified Development Code (UDC)

A. General Overview

The subject property is designated as Mixed Use Non-Residential on the Future Land Use Map (FLUM). The proposed zoning of Light Industrial (I-L) is consistent with the FLUM. The applicant is proposing to construct approximately 15,900 square feet of flex space and 70,250 square feet of self-service storage (storage condos). These uses are listed as allowed in the I-L zoning in the UDC and Comprehensive Plan.

The purpose of the MU-NR designation is to designate areas where new residential dwellings will not be permitted, as residential uses are not compatible with the planned and/or existing uses in these areas. For example, MU-NR areas are used near the City's Wastewater Resource Recovery Facility and where there are heavy industrial or other hazardous operations that need to be buffered from residential.

The subject site is surrounded by Ada County residential properties zoned RUT. However, the broader area is primarily designated as Mixed-Use Non-Residential and Low-Density Residential on FLUM. Industrial spaces and self-storage facilities are a desired use specified in the Mixed-Use Non-Residential designation, as noted above. The multi-tenant industrial spaces provide employment opportunities and valuable spaces for small-scale industrial businesses. Each user will be evaluated at the time of applying for certificate of occupancy.

The self-service storage on the rear of the property is proposed to be constructed with phase one (1) of the development. The multi-tenant industrial buildings fronting on Ten Mile Road will be included in phase two (2) of the development.

The self-service storage (storage condos) are a heightened use for storage, as they will be bought individually for luxury storage. The applicant intends to condo these units once they have begun construction. The applicant will be required to short plat the property to condo the units once the building permits have been submitted.

The multi-tenant industrial building will be allowed to develop with all the uses listed in UDC 11-2C-2, with the further restriction of Storage Facility, Self-Service and Storage, Outdoor. The intent of restricting these uses further is to promote employment uses in these tenant spaces.

Therefore, Staff finds the proposed use should be an appropriate use in the MU-NR FLUM designation for the reasons noted above.

- Slow the outward progression of the City's limits by discouraging fringe area development; encourage development of vacant or underutilized parcels currently within City limits. (4.05.03B) *The subject property is eligible for annexation and has city limits on one (1) of its four sides. Currently, this property is used residentially, and by redeveloping it will provide opportunities for properties to the west to develop.*
- Ensure that regulations and plans support and encourage desired development and land use patterns within the Area of City Impact. (3.01.01C) *Based on feedback from stakeholders, the desired land use for this area is primarily industrial, as Meridian has very little vacancy and is a desirable location for industrial users.*
- "Reduce the number of existing access points onto arterial streets by using methods such as cross-access agreements, access management, and frontage/backage roads, and promoting local and collector street connectivity." (6.01.02B) *The Director recommends a cross-access/ingress-egress easement is granted to the property to the north for future access via Ten Mile Rd. through the subject property to reduce access points on the arterial street (i.e. Ten Mile Rd.).*
- Pursue economic development opportunities with technology, healthcare, environmentally-friendly manufacturing, light industrial, and professional service industries. (2.08.02) *The*

development incorporates a multi-tenant industrial building that will allow for smaller businesses to find a place to operate in Meridian.

Table 4: Project Overview

Description	Details
History	N/A
Physical Features	Piped irrigation ditch next to the five-foot multi-use pathway
Acreage	5.089 Acres

B. Site Development and Use Analysis

1. Existing Structures/Site Improvements (*UDC 11-1*):

The site currently contains four (4) residential and accessory structures. Prior to the issuance of the building permit, these structures shall be removed.

2. Proposed Use Analysis (*UDC 11-2*):

The applicant has indicated the proposed uses for the site intends to be industrial multi-tenant buildings along the Ten Mile Road frontage and self-storage buildings (storage condos) in the rear of the property. The use of industrial buildings and self-storage facilities (storage condos) aligns with the Mixed-Use Non-Residential (MUNR) future land use designation, which accommodates a range of commercial and industrial users. This project not only provides employment and industrial options within city limits but also advances the city's economic goals and meets the needs of its residents. Specifically, it complies with Policy 3.07.01D, which promotes the preservation of industrial land by discouraging non-industrial uses and emphasizing light manufacturing, distribution, flex-space, and base employment. Additionally, it aligns with Policy 3.03.01E, which encourages infill development within the city. The property's location adjacent to N. Ten Mile Road enhances its accessibility and supports the local industrial landscape, addressing the demand for such developments in both the immediate area and the wider community. Furthermore, industrial buildings and self-storage facilities are permitted in the I-L zoning district, which supports the applicant's proposal.

3. Dimensional Standards (*UDC 11-2*):

Development of the site shall comply with the dimensional standards of the I-L zoning district in UDC Table 11-3B-3. *Based on the concept plan and elevations, the applicant is meeting the 35-foot building setback, and 50-foot height limit.*

4. Specific Use Standards (*UDC 11-4-3*):

UDC 11-4-3-34: Storage Facility, Self-Service

a. Storage units and/or areas shall not be used as dwellings or as a commercial or industrial place of business. The manufacture or sale of any item by a tenant from or at a self-service storage facility is specifically prohibited.

The applicant is proposing the storage facility/building to be for storage condos which will be for personal storage use and not for business purposes.

b. On site auctions of unclaimed items by the storage facility owners shall be allowed as a temporary use in accord with Chapter 3, Article E, "temporary use requirements", of this Title.

The applicant will comply with this if and when this happens at the facility.

c. The distance between structures shall be a minimum of twenty-five (25) feet.

The applicant meets this standard.

d. The storage facility shall be completely fenced, walled, or enclosed and screened from public view. Where abutting a residential district or public road, chainlink shall not be allowed as fencing material.

The storage building will have enhanced architecture, and the roll-up doors will be screened from public view. This is not a typical storage building as it will be used for storage condos, which is a more specialized and heightened use. The applicant is also proposing fencing that will fully enclose the storage facility. However, the fencing shall be closed vision.

e. If abutting a residential district, the facility hours of public operation shall be limited to 6:00 a.m. to 11:00 p.m.

The applicant will conform with this standard.

f. A minimum twenty-five-foot wide landscape buffer shall be provided where the facility abuts a residential use, unless a greater buffer width is otherwise required by this title.

Landscaping shall be provided as set forth in subsection 11-3B-9.C of this Title.

The applicant is requesting a council waiver to the 25-foot landscape buffer to reduce it to 10 feet for the adjacent residential properties to the west and south and 15 feet to the north. The applicant has received letters of support from the neighboring property owners to the west and south in support of this waiver.

g. If the use is unattended, the standards in accord with Section [11-3A-16](#), "self-service uses", of this Title shall also apply.

The applicant will comply with these standards.

h. The facility shall have a second means of access for emergency purposes as determined by the Fire Marshal.

The fire department has reviewed the concept plan and has deemed the site to have adequate access.

i. All outdoor storage of material shall be maintained in an orderly manner so as not to create a public nuisance. Materials shall not be stored within the required yards. Stored items shall not block sidewalks or parking areas and may not impede vehicular or pedestrian traffic.

The applicant is not proposing outdoor storage on the site.

j. The site shall not be used as a "vehicle wrecking or junk yard" as herein defined.

The applicant will comply with this standard.

k. For any use requiring the storage of fuel or hazardous material, the use shall be located a minimum of one thousand (1,000) feet from a hospital.

Not applicable.

C. Design Standards Analysis

1. Structure and Site Design Standards (Comp Plan, UDC 11-3A-19):

Based on the concept plan, the applicant appears to comply with the standards outlined in UDC 11-3A-19. The applicant has positioned no more than 50% of the total off-street parking between building facades and abutting streets. Additionally, the building on the eastern portion of the site exceeds the 30% building frontage requirement.

2. Landscaping (UDC 11-3B):

i. Landscape buffers along streets

A 25-foot wide street buffer is required along N. Ten Mile Road, an arterial street. This buffer shall be landscaped per the standards in UDC 11-3B-7C. *The concept plan shows a 35-foot setback from Ten Mile Road with the landscape buffer inside of this meeting this requirement. However, the existing landscaping between the sidewalk and Ten Mile Road will be required to be brought into compliance and landscaped per UDC 11-3B-7C. The*

landscaping will be evaluated with the certificate of zoning compliance and shall be landscaped per UDC 11-3B-5-2B-O.

ii. Parking lot landscaping

Landscaping is required to be provided along all parking areas per the standards listed in UDC 11-3B-8. *The proposed concept plan does not meet the minimum requirements. The western parking landscape shall be widened to 7 feet and the parking stall shall be reduced to 17 feet. The landscaping will be evaluated with the submittal of the certificate of zoning compliance.*

iii. Landscape buffers to adjoining uses

A 25-foot wide buffer is required to the residential land use to the north as set forth in UDC Table 11-2C-3 and 11-4-3-34F, landscaped per the standards listed in UDC 11-3B-9C.

The Applicant requests City Council approval of a reduced buffer width from 25- to 10-feet adjacent to the residential use to the west and south and to 15-feet adjacent to the residential use to the north as allowed by UDC 11-3B-9C.2. A reduction to the buffer width shall not affect building setbacks. A letter was submitted from the abutting property owner to the west and south, agreeing to the proposed reduced buffer. A letter was not provided from the property to the north.

iv. Tree preservation

Per UDC 11-3B-10, the applicant shall preserve existing trees four-inch caliper or greater from destruction during the development.

Mitigation shall be required for all existing trees four-inch caliper or greater that are removed from the site with equal replacement of the total calipers lost on site up to an amount of one hundred (100) percent replacement (Example: Two (2) ten-inch caliper trees removed may be mitigated with four 5-inch caliper trees, five (5) four-inch caliper trees, or seven (7) three-inch caliper trees). Deciduous specimen trees four-inch caliper or greater may count double towards total calipers lost, when planted at entryways, within common open space, and when used as focal elements in landscape design.

A Tree Mitigation Plan should be submitted with the final plat detailing all existing trees and methods of mitigation outlined by the City Arborist before any trees are to be removed as set forth in UDC 11-3B-10C.5.

v. Storm integration

Storm drainage is required to comply with the standards listed in UDC 11-3A-18.

Drainage swales should not be within the landscape setbacks along N. Ten Mile Road.

3. Parking (*UDC 11-3C*):

i. Nonresidential parking analysis

UDC 11-3C-6 requires one space for every two thousand (2,000) sq. ft. of gross floor area in industrial districts. However, staff asked the applicant to provide commercial parking standards for the flex space fronting on Ten Mile Road which require one space for every five hundred (500) sq. ft. of gross floor area. In addition, self service storage facilities only require parking based on the size of the leasing building which was included in the 15,900 square feet. *The applicant is proposing 47 parking spaces on the concept plan which exceeds the 32 spaces that are required with the buildings (15,900 square feet). Additionally, the applicant anticipates potential commercial users will use portions of the site in the future which is why the parking is in excess. The uses will be analyzed as they are proposed within the tenant spaces.*

ii. Bicycle parking analysis

A minimum of one (1) bicycle parking space must be provided for every 25 vehicle spaces or portion thereof per UDC 11-3C-6G; bicycle parking facilities are required to comply with the location and design standards listed in UDC 11-3C-5C. *Bicycle parking is not depicted and the plans shall be revised to incorporate the location of the bicycle parking with the Certificate of Zoning Compliance submittal that meet these requirements.*

4. Building Elevations (*Comp Plan, Architectural Standards Manual*):

Goals 5.01.02C and 2.09.03A of the comprehensive plan promote area beautification and community identity through heightened design standards providing distinct and engaging identities.

The Architectural Standards Manual requires modulation in the surface plane at no less than 50 ft. intervals. There should be at least 2 pedestrian-scale architectural features, and physical distinctions to anchor the building. There should be at least two different field materials, with at least one accent material.

In response, the developer is proposing a multi-tenant industrial building fronting Ten Mile Road with a mix of metal siding. This shall be revised with the submittal of the certificate of zoning compliance to provide an additional two (2) field materials to comply with the ASM.

Additionally, the developer is proposing four (4) storage buildings with the primary material consisting of metal as well. Since these storage buildings are visible from an existing residence, the applicant shall revise the end caps of the storage building to incorporate design elements that comply with the ASM.

The proposed elevations do not meet the architectural manual. However, the applicant shall submit the architectural standards manual checklist with the design review application to ensure compliance with these standards. Staff and the applicant will work together on the elevation during this submittal.

5. Fencing (*UDC 11-3A-6, 11-3A-7*):

All fencing is required to comply with the standards listed in UDC 11-3A-7. *The submitted concept plan shows fencing on the Northwest portion of the site but does not provide details. The applicant shall include fencing details with the submittal of the certificate of zoning compliance. The fencing is required to be closed vision fencing as it is abutting residential.*

D. Transportation Analysis

1. Access (*Comp Plan, UDC 11-3A-3, UDC 11-3H-4*):

Goal 6.01.02B emphasizes reducing the number of access points onto arterial streets by utilizing strategies such as cross-access agreements, access management, and the creation of frontage and backage roads, while also improving connectivity between local and collector streets.

Access is proposed off N. Ten Mile Road (an arterial street) through a single curb cut. The applicant has condensed the two (2) access points to N. Ten Mile into a single access point on the north portion of the property. Doc Lane, the existing and proposed access point, is a 30-foot access easement that runs along the northern portion of the property and provides access to the property to the west (Parcel #S0434142020). The applicant is proposing to improve Doc Lane as the primary access. However, cross access is required to the property from the north and south, which will function as a backage road parallel to N. Ten Mile Road that will align with W. Belltower Drive in the future. At which time, the Doc Lane access will either

be closed or restricted, as determined by ACHD. Staff finds the proposed entrance to be in compliance with the UDC and the comprehensive plan.

Additionally, the applicant shall record cross-access ingress/egress easements with the properties to the north and south prior to approval of the certificate of zoning compliance application.

2. Multiuse Pathways, Pathways, and Sidewalks (*UDC 11-3A-5, Comp Plan, UDC 11-3A-8, 11-3A-17*):

The site has an existing detached 5-foot sidewalk along N. Ten Mile Road, which has been determined to be sufficient by the city parks department. Typically, 10-foot detached multi-use pathways are required along arterial and collector roads. However, the 5-foot detached sidewalk was recently constructed, and the parks department deemed it acceptable at this time. Additionally, the curb cut that is being removed shall be replaced with curb, gutter, sidewalks, and landscaping with the first certificate of zoning compliance application.

The applicant has provided a pedestrian connection to the multi-tenant industrial building fronting Ten Mile Road and along the south side of Doc Lane. This is an adequate pedestrian connection, but where the pedestrian connection crosses through vehicular driving surfaces, it is required to be distinguished from the vehicular driving surface through the use of pavers, colored or scored concrete, or bricks as set forth in UDC 11-3A-19B.4. This shall be revised with the submittal of the certificate of zoning compliance application.

3. Private Streets (*UDC 11-3F-4*):

Doc Lane is currently a private street in Ada County and is used as the main access point for the property to the west (Parcel #S0434142020) of the subject property. The applicant shall provide proof of the approved private street from Ada County or apply for a private street application with the city. This will be required prior to issuance of the certificate of zoning compliance application.

E. Services Analysis

1. Waterways (*Comp Plan, UDC 11-3A-6*):

There is an existing irrigation ditch that was piped on the back of sidewalk. The applicant shall maintain the irrigation pipe and coordinate with the irrigation district for any changes to the irrigation network.

2. Pressurized Irrigation (*UDC 11-3A-15*):

Underground pressurized irrigation water is required to be provided to each lot within the subdivision as set forth in UDC 11-3A-15.

3. Storm Drainage (*UDC 11-3A-18*):

An adequate storm drainage system is required in all developments in accord with the City's adopted standards, specifications and ordinances. Design and construction shall follow best management practice as adopted by the City as set forth in UDC 11-3A-18.

4. Utilities (*Comp Plan, UDC 11-3A-21*):

Connection to City water and sewer services is required and are available to be extended by the developer with development in accord with UDC 11-3A-21 and Goals 3.03.03G & 3.03.03F. Urban sewer and water infrastructure and curb, gutter, and sidewalks are required to be provided with development.

IV. CITY/AGENCY COMMENTS & CONDITIONS

A. Meridian Planning Division

1. A Development Agreement (DA) is required as a provision of annexation of this property. Prior to approval of the annexation ordinance, a DA shall be entered into between the City of Meridian, the property owner(s) at the time of annexation ordinance adoption, and the developer. **A final plat or certificate of zoning compliance shall not be submitted until the DA and Ordinance is approved by City Council.**

Currently, a fee of \$303.00 shall be paid by the Applicant to the Planning Division prior to commencement of the DA. The DA shall be signed by the property owner and returned to the Planning Division within six (6) months of the City Council granting the annexation. The DA shall, at minimum, incorporate the following provisions *IF* City Council determines annexation is in the best interest of the City:

- a. Future development of this site shall be generally consistent with the concept plan, landscape plan, and conceptual building elevations included in Section VIII and the provisions contained herein.
- b. Any future development of the site must comply with the City of Meridian ordinances in effect at the time of the development.
- c. A Certificate of Zoning Compliance and Design Review application(s) shall be submitted and approved prior to submittal of building permit applications for this site.
- d. In accord with UDC 11-3A-3, the applicant shall construct driveway stubs to the north and south property lines and record a cross-access/ingress-egress easement granting accesses to the north (Parcel #S0434417201) and south (Parcel #S0434417605) properties in an effort to combine and limit access points to N. Ten Mile Road. Copies of the recorded easements shall be submitted with the Certificate of Zoning Compliance application for the proposed use.
- e. All existing structures shall be removed from the property prior to issuance of the first building permit.
- f. The applicant shall consolidate all the access points into a single access point as shown on the concept plan. At the submittal of the first certificate of zoning compliance, the access point being removed shall be replaced with curb, gutter, sidewalk, and landscaping in compliance with the UDC.
- g. The multi-tenant industrial building will be allowed to develop with all the uses listed in UDC 11-2C-2, with the further restriction of Storage Facility, Self-Service and Storage Facility, Outdoor.
- h. Provide proof of Doc Lane being an approved private street from the county or apply for a private street application with the city prior to issuance of the certificate of zoning compliance.
- i. Comply with the specific use standards for a Self Service Storage Facility and for all prospective uses going into the multi-tenant industrial building in UDC 11-4-3

B. Meridian Public Works

• Project Consistent with Water Master Plan	Yes
• Impacts/Concerns	None -

NON-PLAT CONDITIONS

PUBLIC WORKS DEPARTMENT

Site Specific Conditions of Approval

1. Bring a 8" Water main from Ten Mile Road to the Western property. The City will need a 20' Easement for this.
2. Install 8" Main to Southern boundary, A 20' Easement is required with the main Centered.
3. A Fence is allowed to cross perpendicular to the City's easement, however it must not have any posts in the easements and any panels crossing the easement must be removable without having to remove other panels. A gate is allowed to cross a City Utility easement, however it must be wide enough to allow the City to have access to the full width of the Easement. No posts are allowed in the easement. City must have ability to open the gate at all times. It will be required to provide a memo stating how the City is to have access on the utility plan.

4. Any wells that will not continue to be used must be properly abandoned according to Idaho Well Construction Standards Rules administered by the Idaho Department of Water Resources (IDWR). The Developer, Owner, or project Engineer, shall provide a statement addressing whether there are any existing wells in the development, and if so, how they will continue to be used, or provide record of their abandonment. If wells are to be abandoned, the project owner or their representative must contact the IDWR Groundwater Protection Section (Aaron Skinner, Hydrogeologist 208-287-4972) BEFORE any work is done to decommission an existing well (even if it is believed that the well is less than 18 ft deep). Proof of communication with IDWR must be submitted to the City prior to any work being done to decommission the well. Failure to communicate with IDWR may result in additional work and expense to decommission the well.
5. Ensure no sewer services pass through infiltration trenches.
6. Provide 20' Easements for mains, hydrant laterals and water services. Easements should extend up to the end of main/hydrant/water meter and 10' beyond it.
5. No permanent structures (trees, bushes, buildings, carports, trash receptacle walls, fences, infiltration trenches, light poles, etc.) to be built within the utility easement.

General Conditions of Approval

1. Applicant shall coordinate water and sewer main size and routing with the Public Works Department.
2. Per Meridian City Code (MCC), the applicant shall be responsible to install sewer and water mains to and through this development. Applicant may be eligible for a reimbursement agreement for infrastructure enhancement per MCC 8-6-5.
3. The applicant shall provide easement(s) for all public water/sewer mains outside of public right of way (include all water services and hydrants). Sewer/water easement varies depending on sewer depth. Sewer 0-20 ft deep require a 30 ft easement, 20-25 ft a 40 ft easement, and 25-30 ft a 45 ft easement. Ensure no permanent structures (trees, bushes, buildings, carports, trash receptacle walls, fences, infiltration trenches, light poles, etc.) are built within the utility easement. Submit an executed easement (on the form available from Public Works), a legal description prepared by an Idaho Licensed Professional Land Surveyor, which must include the area of the easement (marked EXHIBIT A) and an 8 1/2" x 11" map with bearings and distances (marked EXHIBIT B) for review. Both exhibits must be sealed, signed and dated by a Professional Land Surveyor. DO NOT RECORD.
4. The City of Meridian requires that pressurized irrigation systems be supplied by a year-round source of water (UDC 11-3B-6). The applicant should be required to use any existing surface or well water for the primary source. If a surface or well source is not available, a single-point connection to the culinary water system shall be required. If a single-point connection is utilized, the developer will be responsible for the payment of assessments for the common areas prior to receiving development plan approval.
5. Any structures that are allowed to remain shall be subject to evaluation and possible reassignment of street addressing to be in compliance with MCC.
6. All irrigation ditches, canals, laterals, or drains, exclusive of natural waterways, intersecting, crossing or laying adjacent and contiguous to the area being subdivided shall be addressed per UDC 11-3A-6. In performing such work, the applicant shall comply with Idaho Code 42-1207 and any other applicable law or regulation.
7. Any wells that will not continue to be used must be properly abandoned according to Idaho Well Construction Standards Rules administered by the Idaho Department of Water Resources. The

Developer's Engineer shall provide a statement addressing whether there are any existing wells in the development, and if so, how they will continue to be used, or provide record of their abandonment.

8. Any existing septic systems within this project shall be removed from service per City Ordinance Section 9-1-4 and 9-4-8. Contact Central District Health for abandonment procedures and inspections (208)375-5211.
9. All improvements related to public life, safety and health shall be completed prior to occupancy of the structures.
10. Applicant shall be required to pay Public Works development plan review, and construction inspection fees, as determined during the plan review process, prior to the issuance of a plan approval letter.
11. It shall be the responsibility of the applicant to ensure that all development features comply with the Americans with Disabilities Act and the Fair Housing Act.
12. Applicant shall be responsible for application and compliance with any Section 404 Permitting that may be required by the Army Corps of Engineers.
13. Developer shall coordinate mailbox locations with the Meridian Post Office.
14. Compaction test results shall be submitted to the Meridian Building Department for all building pads receiving engineered backfill, where footing would sit atop fill material.
15. The design engineer shall be required to certify that the street centerline elevations are set a minimum of 3-feet above the highest established peak groundwater elevation. This is to ensure that the bottom elevation of the crawl spaces of homes is at least 1-foot above.
16. The applicant's design engineer shall be responsible for inspection of all irrigation and/or drainage facility within this project that do not fall under the jurisdiction of an irrigation district or ACHD. The design engineer shall provide certification that the facilities have been installed in accordance with the approved design plans. This certification will be required before a certificate of occupancy is issued for any structures within the project.
17. At the completion of the project, the applicant shall be responsible to submit record drawings per the City of Meridian AutoCAD standards. These record drawings must be received and approved prior to the issuance of a certification of occupancy for any structures within the project.
18. A street light plan will need to be included in the civil construction plans. Street light plan requirements are listed in section 6-5 of the Improvement Standards for Street Lighting. A copy of the standards can be found at http://www.meridiancity.org/public_works.aspx?id=272.
19. The City of Meridian requires that the owner post to the City a performance surety in the amount of 125% of the total construction cost for all incomplete sewer, water and reuse infrastructure prior to final plat signature. This surety will be verified by a line item cost estimate provided by the owner to the City. The surety can be posted in the form of an irrevocable letter of credit, cash deposit or bond. Applicant must file an application for surety, which can be found on the Community Development Department website. Please contact Land Development Service for more information at 887-2211.
20. The City of Meridian requires that the owner post to the City a warranty surety in the amount of 20% of the total construction cost for all completed sewer, water and reuse infrastructure for duration of two years. This surety will be verified by a line item cost estimate provided by the owner to the City. The surety can be posted in the form of an irrevocable letter of credit, cash deposit or bond. Applicant must file an application for surety, which can be found on the Community Development Department website. Please contact Land Development Service for more information at 887-2211.

V. FINDINGS

A. Annexation (UDC 11-5B-3E)

Upon recommendation from the commission, the council shall make a full investigation and shall, at the public hearing, review the application. In order to grant an annexation and/or rezone, the council shall make the following findings:

1. The map amendment complies with the applicable provisions of the comprehensive plan;

The Commission finds the Applicant's proposal to annex 5 acres of land with I-L zoning for the development of 15,900 square feet of multi-tenant industrial and 70,250 square feet of self-

service storage (storage condos) is consistent with the Mixed Use Non-Residential FLUM designation for this property.

2. The map amendment complies with the regulations outlined for the proposed district, specifically the purpose statement;

The Commission finds the proposed map amendment to I-L and conceptual development plan generally complies with the purpose statement of the I-L district in that it will encourage industrial uses that are clean, quiet and free of hazardous or objectionable elements and that are operated entirely or almost entirely within enclosed structures and is accessible to an arterial street (i.e. Ten Mile Road).

3. The map amendment shall not be materially detrimental to the public health, safety, and welfare;

The Commission finds the proposed map amendment should not be detrimental to the public health, safety and welfare as the proposed industrial use should be conducted entirely within a structure.

4. The map amendment shall not result in an adverse impact upon the delivery of services by any political subdivision providing public services within the city including, but not limited to, school districts; and

The Commission finds City services are available to be provided to this development.

5. The annexation (as applicable) is in the best interest of city.

The Commission finds the proposed annexation is in the best interest of the city.

VI. ACTION

A. Staff:

Staff recommend approval of the proposed annexation with the requirement of a Development Agreement.

B. Commission:

The Meridian Planning & Zoning Commission heard these items on August 21st, 2025. At the public hearing, the Commission moved to recommend approval of the subject annexation request.

1. Summary of Commission public hearing:

- a. In favor: Jeff Hatch, Chris Adler
- b. In opposition: None
- c. Commenting: Jeff Hatch and Chris Adler
- d. Written testimony: None
- e. Staff presenting application: Nick Napoli
- f. Other Staff commenting on application: None

2. Key issue(s) of public testimony:

- a. None

3. Key issue(s) of discussion by Commission:

- a. The commission had a brief discussion about the reduced landscape buffers to the existing residences. They ultimately determined they had no concerns with this; however, it is a council decision.

4. Commission change(s) to Staff recommendation:

- a. None

5. Outstanding issue(s) for City Council:

- a. Council waiver to reduce the 25-foot landscape buffer to the existing residential properties to 10 feet to the south and west and 15 feet to the north.

C. City Council:

Pending
