III. STAFF ANALYSIS

Staff has reviewed the proposed final plat for substantial compliance with the approved preliminary plat (H-2023-0041) in accord with the requirements listed in UDC 11-6B-3C.2.

The preliminary plat included a condition (i.e. #2.1g) for a local public street to be provided off S. Oak Briar Way between Lots 1 and 2, Block 1 for access to these lots instead of a direct access to the collector street. It was required to extend at a minimum, to the east boundary of Lot 2, Block 1 and to extend to the south with future re-subdivision of Lot 3, Block 1. Based on the City's requirement, ACHD also included conditions (i.e. #10 & #11) that required a local street to be constructed between these two lots and extend to the site's east property line. Since

that time, ACHD has determined they will *not* allow a local street in this location. After much discussion with ACHD on this matter, Staff requests Council approval of a change to the access in this location to allow a private driveway access via S. Oak Briar Way on Lot 1, Block 1 with a temporary ingress-egress easement to Lot 2, Block 1. When an alternate access is available for Lot 2 with development of Lot 3, Block 1, the access easement should terminate, and access should be provided via a local public street.

For the proposed final plat to be deemed in substantial compliance with the approved preliminary plat as set forth in UDC 11-6B-3C.2, the number of buildable lots cannot increase, and the amount of common area cannot decrease. Because there is no change to the number of buildable lots and no common open space in this phase, Staff deems the proposed final plat to be in substantial compliance with the approved preliminary plat, as required.

IV. DECISION

Staff recommends approval of the proposed final plat with the conditions noted in Section VI of this report.
