

Town Administrator Report

September 9, 2025

The following updates are provided for Commission and community information only. No action is required at this time.

Street Lighting Requests

Recently, the Town has received citizen complaints regarding malfunctioning “purple” streetlights. After consulting with Duke Energy representatives, the most efficient way for residents to report streetlight issues, including color changes or outages, is directly through Duke Energy’s online portal:

<https://www.duke-energy.com/customer-service/request-light-repair>

This method ensures prompt identification, tracking, and repair of affected fixtures.

2025-2026 Fiscal Year Projects

For the upcoming fiscal year, staff will focus on projects identified through citizen requests and ongoing needs:

1. Striping Requests – Striping work will be completed on both ends of Seminary Avenue, within downtown parking areas, and in designated traffic-calming zones.
2. Road Inventory and Condition Assessment – A comprehensive survey of Town roads will be undertaken to document existing conditions and help prioritize maintenance. This assessment has been on the Town’s project list for some time and will provide useful baseline data for future planning.

These projects reflect the Town’s commitment to addressing community input and ensuring long-term roadway management.
