F. 7-Brew Drive-Thru Coffee, 12875 Highway 9 (building review)

Applicant: Tom True / True Results, LLC.

Request:

- Courtesy review of the building design plan for a coffee building and pavilion.

A Motion to approve the building plans as presented was made by Ken Warlick with the following recommendations:

1. Reduce the scale of the cupola atop the pavilion to ensure proportionality with the overall structure; consider reducing its size by approximately 50%.
2. Adjust roof overhang dimensions, as the current 24" projection appears oversized; recommend limiting overhangs to a range of 8"-12" to maintain architectural balance.
3. Refine shutter color selection by using a darker tone such as Sherwin-Williams "Iron Ore" or a comparable black shade for a more cohesive and classic aesthetic.
4. SDL Bars on both upper and lower window sashes for consistency in fenestration design and to enhance the architectural character.
5. Include a comprehensive sample board in the final review packet, with details on all proposed exterior colors and materials to include brick color, roof color, paint, gutter color, lights.
6. Remove scalloped gable detailing; instead, consider incorporating louvered vents in a triangle.
7. Provide a detailed drawing of the simplified angle bracket, remove the horizontal and vertical detail portion of it.
8. Remove the raised hip detail on all four sides of the roof.
9. Explore 4-foot extension on the drive thru canopy, by adding some detail such as a bracket on the end to soften the design up a bit.
10. Ensure renderings include the opposite side of the walk-up area, providing a complete view for evaluation of symmetry and design integration.
