8. NEW BUSINESS

A. The Board provided the following feedback on short-term rental (STR) questions that staff prepared:

- Allowing STRs is a slippery slope and can lead to including accessory dwelling units and other issues.
- If the City allows STRs, neighborhoods with HOAs will probably not allow them but some equestrian neighborhoods without HOAs may have enforcement issues because there is no way to say no STRs.
- STRs should not be allowed in general.
- Discussed the ability of the City to permit STRs in certain zoning districts (potentially downtown areas) like Alpharetta and Roswell do.
- Understand the financial implications of STRs and identify some situations (house remodeling and construction) where people may want a STR but think it is counter-intuitive to what the City's mission is.
- Staff should approach this very carefully and do more research on what neighboring cities are doing.

B. The Board would like to check the policies and procedures for recommending approvals or denials on variance, use permits, and rezoning cases, and to clarify that their recommendations are only based on architecture and design, especially when offering recommendations for multi-part variances and use permit requests. Staff will look into this and will provide answers at the next DRB Meeting.
