Demolition Plan Review – 15585 Freemanville Road  
Prepared by the Community Development Department for the  
Design Review Board Meeting on July 9, 2024

## COMMUNITY DEVELOPMENT STAFF ANALYSIS

STAFF LIAISON: Jackie Jennings  
678.242.2528

### **Background:**

The subject site is made up of two land lots totaling 50.12 acres. The properties are both zoned AG-1 within the Rural Milton Overlay District. The applicant requests a Certificate of Appropriateness to demolish the existing pole barns and shed as shown on the site plan received by Community Development on May 14, 2024.

### Additional information:

1. The preliminary plat for this property (Blakely Manor) has been approved, to subdivide the AG-1 zoned parcel into 36 single-family detached home lots on 50.91 acres with a density of 0.72 units/acre.
2. The existing septic tank for this site will be demolished in place or removed from the site as part of the demolition activities
3. Existing on-site septic absorption trenches will be abandoned in place.

### **Standards for Consideration:**

#### UDC 12.8.6(c) - Criteria for approving a demolition permit.

The City of Milton Design Review Board shall use the following criteria in deciding to approve or deny a demolition permit:

1. Is the building or structure listed on the "Georgia's Natural, Archaeological and Historic Resources Geographic Information System"?
2. Is there any historic, scenic, or architectural significance of the building, structure, site, or object?
3. Is there any significant importance of the building, structure, site, or object to the ambiance of the area?
4. Would it be difficult or impossible to reproduce such a building, structure, site, or object because of its design, texture, material, detail, or unique location?
5. Whether the building, structure, site, or object is one of the last remaining examples of its kind in the neighborhood or the city.
6. Whether there are definite plans for use of the property if the proposed demolition is carried out, and what the effect of those plans on the character of the surrounding area would be.

7. Whether reasonable measures can be taken to save the building, structure, site, or object from collapse.
8. Whether the building, structure, site, or object is capable of earning reasonable economic return on its value.

### **Recommendations:**

Community Development staff determines that the application for a Certificate of Appropriateness for demolition complies with the criteria according to Sec. 12.8.6(c) of the Unified Development Code. Neither of the homes requesting to be demolished are listed in Georgia's Natural, Archeological, and Historic Resources GIS and Milton's Historic Survey List. Therefore, Staff recommends **Approval** of the demolition plan with the following comments:

- Applicant must submit a complete Demo Permit Application to include:
  - a) Demolition/Site Plan;
  - b) Letter from Pest Control Service verifying that property is free of vermin and other pests that may migrate to other properties, or that vermin and other pests have been properly exterminated;
  - c) A letter documenting if asbestos is present or not present in the existing structure, and documentation confirming removal and disposal of asbestos materials as necessary.
- If not used, septic must be demolished in place or removed from the site according to Fulton County's procedures.
- Show limits of disturbance (tree save fence at the edge of disturbance and silt fence in front of the tree save fence).
- No trees are to be removed without obtaining a permit from the city.
- Level and grass the area that was disturbed.
