RE: 542 Main Street Updates

DATE: September 30, 2024

Hi Madison,

Per your request, the updated items are as follows:

1. Upgrade LP siding to scored concrete (light 3/8 stucco) – see attached rendering
2. Update exterior lighting soffit/wall sconce to dark sky compliant - see attached rendering & light plan.
3. Update stone to slight lighter color palette. See attached rendering
4. Update drive to paver drive rather than gravel. Does not effect impervious as gravel was accounted for in impervious measurements on final approved plan.

While I realize very very minor, I want to ensure we are following all guidelines correctly via minor review submittal. Thank you-Lisa
