Re: Downtown Streetscape Project Summary

City of Montgomery

Dear Mayor and Council:

As are aware MEDC has commissioned Ardurra to complete the Downtown Streetscape Improvements Project which includes repaving, and streetscape improvements to the Historical Downtown. WGA has, concurrently, been working on the design of waterline improvements in the same project area to accommodate for the proposed surface improvements. This memo serves as an update as to where design, schedule and associated costs currently stand with the project.

<u>Surface Improvements</u>: Based on preliminary conversations between the Mayor, MEDC President and the property owner, the Steakhouse owner appears to be open to discussing opening up the existing parking lot as a driveway. WGA is working to schedule a meeting with the property owner by the end of the month to review and discuss this in detail. Assuming an agreement is reached, the next steps would be to obtain an easement across the property to allow for construction, use and maintenance of the roadway. Additionally, a decision will need to be made regarding Maiden and if it is to be improved as a part of this project due to traffic being directed onto Maiden, from McCowan via this new driveway.

<u>Storm Sewer</u>: WGA is working with Ardurra to include the storm sewer replacement within the project. The final layout of the storm sewer may be impacted by the decision of the steakhouse driveway; therefore, the scope of the storm sewer will be finalized once an agreement has been reached with the property owner, or a decision has been made not to proceed with the driveway to Maiden.

<u>Waterline</u>: WGA has revised the scope of the previously authorized downtown waterline replacement to just include what would be necessary for the streetscape improvements project. The remaining work will be completed at a later date.

<u>Schedule</u>: Due to the final scope and layout not being defined, an accurate schedule can not be outlined. Once a decision has been made regarding the driveway to Maiden Steet WGA/Ardurra can provide an accurate schedule with accompanying milestones.

<u>Costs</u>: Based on cost estimates prepared by WGA and Ardurra, below is a breakdown of the estimated construction costs for the project.

| Streetscape Improvements | \$1,565,410 |
|--|------------------------|
| (Does not include the driveway to Maiden St.) | 1 / / |
| Waterline Replacement – Reduced Scope | \$175,000 ¹ |
| (725LF of 8" WL) | 7175,000 |
| Storm Sewer (385LF 36" RCP) | \$100,000 ¹ |
| Testing, Inspection, and Construction Administration | \$100,000 |
| Total Estimated Construction Costs | \$1,950,000 |

^{1.} Assumes that these projects are being bid and constructed with the same contract.

Based on the aforementioned information the following steps needed to keep progress moving are as follows:

- Confirm final layout of the streetscape improvements based on conversation with Steakhouse Owner.
- Revise cost estimate based on final layout and prepare bid package documentation.

If you have any questions or comments, please contact me.

Sincerely,

Chris Roznovsky, PE City Engineer

Chris Romasy
